N.A. Not applicable.

(1) MRLs do not apply to products or part of products that by their characteristics and nature are used exclusively as ingredients of animal feed, until sparate MRLs are set in the specific category 1200000.

(2) The term 'Others' covers any other product not explicitly mentioned under the rest of the codes within the same group or subgroup, in the columns 'Main product of the group or subgroup' of Part A and 'Other products to which the same MRLs apply' of Part B.

(3) Kernels are defined as whole grains including the bran.

(4) Kernels are defined as whole grains including the bran. In line with the definition agreed in the CCPR 2016 meeting, for the species and varieties in which husks cannot be (fully) removed by threshing (e.g. barley, oats, spelt, buckwheat, certain pseudocereals), the part of the product to which MRLs apply is ‘kernel with remaining (traces of) husks’.

(5) In all cases the MRL values are expressed as mg/kg of raw milk. Where the residue definition is marked as fat soluble (by letter F) the MRL is based on raw cow milk with a fat content of 4 % by weight; for raw milk of other species the MRL value shall be adjusted proportionally according to the fat content of the raw milk of that species.

(6) In all cases the MRL values are expressed as mg/kg of eggs. Where the residue definition is marked as fat soluble (by letter F) the MRL is based on hen eggs with a fat content of 10 % by weight; for eggs of other species the MRL value shall be adjusted proportionally according to the fat content of the eggs of that species, if the fat content is higher than 10 % by weight.

(7) No MRLs are applicable to other apiculture products until individual products have been identified and listed within this group.

(8) No MRLs are applicable until individual products have been identified and listed within this category.
