**MAXIMUM LIMITS OF PESTICIDE RESIDUES  
IN AGRICULTURAL AND FOOD  
PRODUCTS**

**Prepared by:**

Gulf technical committee for sector standards of  
Food and agriculture products

This document is a draft Gulf standard circulated for comments, it is  
therefore, subject to alteration and modification, and may not be referred as a  
Gulf standard, until approved by the Board of Directors

**ICS:65.100**

## Foreword

GCC Standardization Organization (GSO) is a regional Organization which consists of the National Standards Bodies of GCC member States. One of GSO main functions is to issue Gulf Standards /Technical regulations through specialized technical committees (TCs).

GSO through the technical program of committee TC No 5 "*Gulf technical committee for standards of food and agriculture products*" has updated the "**MAXIMUM LIMITS OF PESTICIDE RESIDUES** /GSO Standard No. 382, 383 :1994 **IN AGRICULTURAL AND FOODPRODUCTS**"- PART 1, 2 . The Draft Standard has been prepared by (*Kingdom of Saudi Arabia*).

This standard has been approved as a Gulf (Technical Regulation) by GSO Board of Directors in its meeting No.( ),held on / / H, / /

G. The approved standard will replace and supersede the GSO standard No. 382, 383 :1994

**MAXIMUM LIMITS OF PESTICIDE RESIDUES  
IN AGRICULTURAL AND FOOD  
PRODUCTS**

**Date of GSO Board of Directors' Approval :**  
**Issuing Status : Technical Regulation**

# **MAXIMUM LIMITS OF PESTICIDE RESIDUES IN AGRICULTURAL AND FOOD PRODUCTS**

## **1. SCOPE AND FIELD OF APPLICATION**

This standard is concerned with maximum limits for the following pesticide residues in or on foods and agricultural commodities.

## **2. COMPLEMENTARY REFERENCES**

- 2.1 GSO Standard on "Sampling for Determination of Pesticide Residues in Food and Agricultural Products".
- 2.2 GSO Standard on "Methods of Determination of Pesticide Residues in Food and Agricultural Products".

## **3. DEFINITIONS**

### **3.1 Acceptable Daily Intake (ADI)**

"ADI" of a chemical is the daily intake which, during an entire lifetime, appears to be without appreciable risk to the health of the consumer on the basis of all the known facts at the time of the evaluation of the chemical by the Joint FAO/WHO Meeting on Pesticide Residues. It is expressed in milligrams of the chemical per kilogram of body weight. (Note: For additional information on ADIs relative to pesticide residues refer to the Report of the 1975 Joint FAO/WHO Meeting on Pesticide Residues, FAO Plant Production and Protection Series No.1 or WHO Technical Report Series No. 592).

### **3.2 Extraneous Maximum Residue Limit (EMRL)**

"EMRL" refers to a pesticide residue or a contaminant arising from environmental sources (including former agricultural uses) other than the use of a pesticide or contaminant substance directly or indirectly on the commodity. It is the maximum concentration of a pesticide residue or contaminant that is recommended by the Codex Alimentarius Commission to be legally permitted or recognized as acceptable in or on a food, agricultural commodity, or animal feed. The concentration is expressed in milligrams of pesticide residue or contaminant per kilogram of the commodity.

### **3.3 Good Agricultural Practice in the Use of Pesticides (GAP)**

"GAP" includes the nationally authorised safe uses of pesticides under actual conditions necessary for effective and reliable pest control. It encompasses a range of levels of pesticide applications up to the highest authorised use, applied in a manner which leaves a residue which is the smallest amount practicable. Authorised safe uses are determined at the national level and include nationally registered or recommended uses, which take into account public and occupational health and environmental safety considerations. Actual conditions include any stage in the production, storage, transport, distribution and processing of food commodities and animal feed.

### **3.4 Limit of Determination ( LOD )**

"Limit of determination" is the lowest concentration of a pesticide residue or contaminant that can be identified and quantitatively measured in a specified food, agricultural commodity, or animal feed with an acceptable degree of certainty by a regulatory method of analysis.

### **3.5 Maximum Residue Limit (MRL)**

"MRL" is the maximum concentration of a pesticide residue (expressed as mg/kg), recommended by the Codex Alimentarius Commission to be legally permitted in or in food commodities and animal feeds. MRLs are based on GAP data and foods derived from commodities that comply with the respective MRLs are intended to be toxicologically acceptable.

### **3.6 Pesticide**

"Pesticide" means any substance intended for preventing, destroying, attracting, repelling, or controlling any pest including unwanted species of plants or animals during the production, storage, transport, distribution, and processing of food, agricultural commodities, or animal feeds or which may be administered to animals for the control of ectoparasites. The term includes substances intended for use as a plant-growth regulator, defoliant, desiccant, fruit thinning agent, or sprouting inhibitor and substances applied to crops either before or after harvest to protect the commodity from deterioration during storage and transport. The term normally excludes fertilizers, plant and animal nutrients, food additives and animal drugs. (Note: "Agricultural commodities" refers to commodities such as raw cereals, sugar beet, and cottonseed which might not, in the general sense, be considered food).

### **3.7 Pesticide Residue**

"Pesticide residue" means any specified substances in food, agricultural commodities, or animal feed resulting from the use of a pesticide. The term includes any derivatives of a pesticide, such as conversion products, metabolites, reaction products, and impurities considered to be of toxicological significance. (Note: The term "pesticide residue" includes residues from unknown or unavoidable sources (e.g., environmental), as well as known uses of the chemical).

### **3.8 Temporary Acceptable Daily Intake**

"Temporary ADI" is an acceptable daily intake established for a specified, limited period to enable additional biochemical, toxicological or other data to be obtained as may be required for estimating an acceptable daily intake. (Note: A TADI estimated by the Joint FAO/WHO Meeting on Pesticide Residues normally involves the application of a safety factor larger than that used in estimating an ADI).

### **3.9 Animal feed**

Harvested fodder crops, by-products of agricultural crops and other products of plant or animal origin which are used for animal feeding and which are not intended for human consumption.

## **4. REQUIREMENTS**

Pesticide residue limits in or on food, agricultural commodities or animal feeds shall not exceed the limits given against each in the following Tables.

**5. SAMPLING**

Sampling shall be carried out according to the GSO standard mentioned in 2.2.

**6. METHODS OF TESTING**

Pesticide residues shall be determined according to the GSO standard to be approved by GSO on “Methods of Test for Pesticides Residues in Agricultural and Food Commodities

SUBSTANCE	COMMODITY	MRL	REMARK
2,4-D – (20)  Functional class: Herbicide	Berries and other small fruits	0.1	
	Citrus fruits	1	The MRL accommodates post-harvest treatment of the commodity
	Edible offal (mammalian)	5	
	Eggs	0.01	At or about the limit of determination
	Hay or fodder (dry) of grasses	400	
	Maize	0.05	
	Maize fodder (dry)	40	
	Meat (from mammals other than marine mammals)	0.2	
	Milks	0.01	
	Pome fruits	0.01	At or about the limit of determination
	Potato	0.2	
	Poultry meat	0.05	At or about the limit of determination
	Poultry, Edible offal of	0.05	At or about the limit of determination
	Rice straw and fodder, Dry	10	
	Rice, Husked	0.1	
	Rye	2	
	Sorghum	0.01	At or about the limit of determination
	Soya bean (dry)	0.01	At or about the limit of determination
	Soya bean fodder	0.01	At or about the limit of determination
	Stone fruits	0.05	At or about the limit of determination
	Sugar cane	0.05	
	Sweet corn (corn-on-the-cob)	0.05	At or about the limit of determination
	Tree nuts	0.2	
	Wheat	2	
	Wheat straw and fodder, Dry	100	
2-Phenylphenol –	Citrus fruits	10	The MRL accommodates post-harvest

SUBSTANCE	COMMODITY	MRL	REMARK
(56) Functional class: Fungicide			treatment of the commodity
	Citrus pulp, Dry	60	The MRL accommodates post-harvest treatment of the primary food commodity
	Orange juice	0.5	The MRL accommodates post-harvest treatment of the primary food commodity
	Pear	20	The MRL accommodates post-harvest treatment of the commodity
Abamectin – (177) Functional class: Insecticide	Almond hulls	0.1	
	Almonds	0.01	At or about the limit of determination
	Apple	0.02	
	Cattle fat	0.1	The MRL accommodates external animal treatment
	Cattle kidney	0.05	The MRL accommodates external animal treatment
	Cattle liver	0.1	The MRL accommodates external animal treatment
