ORDER

______________

Kyiv No. ____________

On Approving Rules
for Mandatory Certification
of Gambling Machines with Monetary
Winnings

With the view of protecting the rights of citizens who take part, in accordance with the established procedure, in gambling, of minimizing possible abuse and fraud both during and after gambling with the use of gambling machines, and of establishing uniform requirements for gambling machines and manufacture thereof

APPROVED

By Order of Derzhspozhyvstandart of Ukraine

No. ____________ of ____________
Rules
for Mandatory Certification
of Gambling Machines with Monetary Winnings

I. General Provisions

1. These Rules establish mandatory requirements for gambling machines with monetary winnings (hereinafter “gambling machines”) and the procedure for the assessment of gambling machines’ conformity with these requirements.

2. The procedure for the assessment of gambling machines’ conformity with the mandatory requirements shall be put into effect by way of mandatory:
   - certification of the gambling machine type conformity;
   - primary certification of conformity of the gambling machine to the type;
   - certification of conformity of the gambling machine;
   - periodic inspections of gambling machines in operation.

3. These Rules shall be mandatory for the gambling machine certification bodies that are assigned and authorized to carry out these works, as well as for business subjects operating in the field of gambling business, including foreign entities.

4. Mandatory certification and periodic inspections of gambling machines shall be carried out by gambling machine certification bodies (hereinafter “certification bodies”) that are assigned and authorized by the National certification authority of Ukraine, the State Committee of Ukraine on Technical Regulation and Consumer Policy, to carry out works for certification of gambling machines, in accordance with the procedure established in DSTU 3411.

5. Subject to the mandatory certification shall be gambling machines put out in Ukraine or beyond its borders, and intended for use in gambling establishments in the Ukrainian territory, as well as such gambling machines as were put into operation in gambling establishments in the Ukrainian territory prior to entry into force of these Rules.

6. Gambling machines that are put out, shall be subject to certification of the type conformity and to primary certification of conformity of each gambling machine to the type, prior to putting into operation.

7. Gambling machines put into operation in gambling establishments in the Ukrainian territory before entry into force of these Rules, shall be subject to certification of gambling machine conformity, to be carried out at the request of business subjects in the field of gambling business, as stipulated in section IV of these Rules, and shall be required to be completed within a period of three years from the date of entry into force of these Rules.

8. Allowed for operation shall be solely such gambling machines as have undergone the mandatory certification according to these Rules and have been entered in the Register of gambling machines.
The Register of gambling machines that have undergone certification and periodic inspection (hereinafter “the Register”), shall be maintained by the national certification authority of Ukraine, the State Committee of Ukraine on Technical Regulation and Consumer Policy.

The form and procedure for maintaining the Register shall be established by the State Committee of Ukraine on Technical Regulation and Consumer Policy.

9. The requirements for the realization by gambling machines of fiscal functions shall be established in accordance with current law.

10. The requirements for the safety and for the electromagnetic compatibility of gambling machines shall be established in the relevant technical regulations, and prior to entry into force of such, in the List of Products Subject to Mandatory Certification in Ukraine, as approved by The State Committee of Ukraine on Technical Regulation and Consumer Policy’s Order No. 28 of February 01, 2005, registered with the Ministry of Justice of Ukraine on May 04, 2005 under No. 466/10746.

11. Mandatory certification of gambling machines shall be carried out to assess the conformity with the mandatory requirements set out in section II of these Rules.

12. The Procedure for conformity assessment of gambling machines shall provide for:
   Filing of an application for the certification;
   Review of the application, the analysis of documents attached to the application, and the adoption of a decision on the application;
   Attestation of production facilities used to manufacture gambling machines that are being certified, or certification (assessment) of the production quality management system in place;
   Selection and identification of gambling machine samples for testing;
   Testing of the gambling machine samples;
   Analysis of the obtained results and adoption of a decision on the possibility of issuing a certificate of the type conformity and/or a certificate of the gambling machine’s conformity with the type, or a certificate of the gambling machine’s conformity;
   Issuance of a certificate of the type conformity and/or a certificate of the gambling machine’s conformity with the type, or a certificate of the gambling machine’s conformity, and entry of thus certified gambling machines in the Register;
   Technical surveillance of the certified gambling machines in the process of manufacture thereof;
   Periodic inspections of gambling machines in the process of operation thereof;
   Reporting on the results of gambling machine certification works and on the results of periodic inspections of gambling machines in the process of operation thereof.

13. For the purpose of these Rules, terms and definitions shall have the following meanings:
   Game of chance: a game the participation in which provides an opportunity to receive winnings, the result of which is determined by actions (events) that, in full or in part, depend on chance, and the participation in which is conditioned on making by the gamer of a stake;
   Hardware: the aggregate of a gambling machine’s physical components;
   Random number generator: a software program that generates a random sequence of numbers according to a distribution law as determined by the manufacturer;
Playing the gambling machines: a game of chance where the gambling machine used counts the stakes and determines the amount of the monetary winnings, that game consisting of a sequence of actions that occur between the game’s start and finish and comprise gamers’ actions in the framework of the rules of the game and the corresponding actions of the gambling machine according to program;

Gamer: a physical person who, by his/her own wish, take part in a game of chance conducted by the licensee according to the rules set for its conduct;

Gambling machine with monetary winnings: mechanical, electric, or electronic equipment or device used to conduct games of chance the results of which are determined without the participation of a licensee’s employee, by this equipment’s (device’s) operation software making use of a random number generator contained inside such equipment’s (device’s) cabinet, and the amount of winnings is automatically determined by the equipment (device);

Monetary winnings: money paid out to a gamer as a result of the game, in accordance with the rules of the game of chance;

Game program: a program that backs up, according to the rules of the game, the aggregate of the relevant actions of the gambling machine that are determined by actions of the gamers;

Credit: a conventional unit expressing the amount of money within the limits of which stakes may be made;

Winnings coefficient: a ratio, percent, between the amount of winnings and the amount of stakes in a base number of games, that expresses the probability of recovery of the stakes made;

Base number of games: the number of games fixed by the manufacturer for the statistically reliable determination of the winnings coefficient, within the limits of 100,000 to the value of the total number of all possible combinations of symbols employed in the game;

Licensee: a business subject issued with a license for the organizational activity to conduct games of chance with the application of gambling machines;

Nominal value of credit: value of the conventional unit in Hryvnias;

Rules of the game played on gambling machines: schedule of terms and conditions, rights, duties, and the sequence of actions of gamers and the licensee, of methods for the determination of game result and of the monetary winnings, subject to be set by the licensee;

Game result: the result of interaction, in the process of the game, between the gamer and the gambling machine, emerging after completion of the game and expressed in money units;

Stake: gamer’s payment for taking part in the game of chance, the amount of which serves to determine the amount of winnings. Deemed a stake could also be the winnings used to take part in the next game;

Gambling machine type: an aggregate of functionally identical gambling machine models the design of which is based on one and the same principle, having similar hardware, game programs, electric circuit diagrams, components, and printed
circuit boards, and produced by one and the same manufacturer based on one and the same set of technical documentation;

Duration of single game: a period of time between the start of the game (pressing of button) and the moment of the game result presentation.

Other terms and definitions shall have the meanings as set out in DSTU 2462:94 “Certification. Basic Notions. Terms and Definitions”.

II. Requirements for Gambling Machines

1. A manufacturer of a gambling machine shall be required to affix to the external surface of the gambling machine cabinet, an identification plate, impossible to remove easily, containing the following data:
   a) the gambling machine manufacturer’s name and the country of location;
   b) designations of the gambling machine’s type and model;
   c) the gambling machine’s serial number;
   d) date of manufacture.

2. A gambling machine’s cabinet must be of solid design and protected from unauthorized interference. All external doors must be closed with special keys and furnished with door opening detectors.

3. Before the start of stakes reception, a gamer must receive visual information containing clear description, in Ukrainian language, of the rules and terms and conditions for the conduct of game, and a table of possible winnings. Such information must also contain the indication of the nominal value of credit, and must be accessible to gamer even if no game is conducted.

4. All winning combinations and the respective amounts of winnings, current amount of the gamer’s credit comprised of such winnings and credits as have been put in by the gamer, must be displayed at the gambling machine’s display monitor.

5. A gambling machine must display information on the result of each game, not subject to revision.

6. A gamer must be provided with an opportunity to pay in several credits at once, and must have an opportunity to recover credits and winnings not used in game, at any time after ending the game.

7. In case of any malfunction, a gambling machine must suspend all games and payments. Malfunction status must be displayed by the gambling machine.

8. A gambling machine must, employing means of light and/or aural signaling, provide information on the impossibility of further conduct of the game and on:
   jamming of tokens, coins, or bills;
   breakage or emptying of the coin or token receiver;
   opening of any gambling machine’s door;
   the fact of receiving input coins, tokens, or bills;
   program errors;
   RAM errors.
9. Correspondence must be ensured between the gamer interface control means and their functions according to the rules of the game. Functions of gamer interface control means must be set forth in Ukrainian language.

10. A gambling machine must display the following information on the current status of the game:
   a) stake;
   b) credit;
   в) winnings;
   г) result of the game;
   д) accumulation fund, if such is generated by the gambling machine.

11. In case of power supply failure or its drop to the level where normal functioning is disrupted, after resumption thereof, capacity must be ensured of returning to such status as the gambling machine had immediately before the power supply disruption.

12. Any alteration by gamer of the rules of the game must be precluded.

13. Money reception devices must enable putting in at least one of the payment forms: coins, tokens, or bills. Displayed on a gambling machine must be the information on the nominal value of credit.

14. Gambling machine cabinet and the money reception device, and the channel for removing unfit tokens or coins, must have protection from the penetration of wire or foreign objects inside the gambling machine components, suitable for tampering with the operation of the gambling machine’s attachments and mechanisms.

15. A gambling machine must fully preserve the capacity for normal functioning after the impact of an air electrostatic discharge of 27 kV, according to DSTU IEC 61000-4-2.

16. A gambling machine must have electronic meters of at least 6 digits that register the following information:
   the total amount of paid-in credits for the participation in games;
   the total amount of paid-out credits;
   the amount of credits in the accumulation fund (if applicable);
   the total number of played games.

17. Each meter must have adequate marking indicating its intended use.

18. Electronic meter readings must be stored in a power-independent memory. Software must check up on the inviolability of these data in each hookup of the machine to the power supply network.

19. In case of disconnection of a gambling machine from power supply source, readings of the electronic meters must be preserved for a period of at least 90 days.

20. Software carriers must have markings containing information enabling the identification of the program version and of the level of modification of the information stored in the carrier. All carriers must be placed in a sealed casing located inside the gambling machine cabinet. The casing design and seal positioning shall preclude access inside the casing without damaging the casing or the sealing.
21. Software carriers must ensure the possibility of reading and identification via the hardware interface or by means of an external readout device supplied by the manufacturer.

22. Where software carriers do not functionally provide for re-programming, impossibility must be secured of access to leads of the integrated circuits that perform the carrier functions, and there must be no external ports.

23. Programs determining game results, must be registered in the memory subject solely to reading out.

24. A gambling machine must be protected from the possibility of unauthorized alteration of the program.

25. The duration of one game shall be no less than two seconds. During the game, there must be no opportunity to make new stakes.

26. A game program algorithm must be based on the principle of random selection, and the game result must be determined by using a random number generator.

27. A game program algorithm must assure a winnings coefficient of at least 80%.

28. The algorithm of the random number generator and the alteration of the random numbers range must satisfy the following conditions:
   a random number must be statistically independent;
   a random number can not be predicted in advance.

29. Altering the winnings coefficient must only be possible within the limits of a value fixed by these Rules, and only by the method stipulated by the manufacturer.

30. The system of power supply must ensure the operation of a gambling machine in conformity with the rules of the game, within the limits of such voltage and frequency fluctuations as are tolerated in Ukrainian AC power grids.

III. Conformity Assessment Procedures

1. Procedure for Carrying out Mandatory Certification of Gambling Machine Type Conformity

1. Subject to mandatory certification of gambling machine type conformity shall be gambling machines manufactured in Ukraine or beyond its borders and intended for putting into operation in the Ukrainian territory but not entered in the Register.

2. Mandatory certification of gambling machine type conformity consists of the following:
   filing of an application for certification;
   consideration of the application, analysis of documents attached to the application, and adoption of a decision on the application;
   performance of the production facility attestation or of the quality management system assessment (at the applicant’s option);
   selection, identification, and testing of type samples;
analysis of the obtained results and adoption of a decision on the possibility of issuing a certificate of type conformity;
issuance of the certificate of the gambling machine type conformity, and entry of the certified gambling machine type in the Register;
technical supervision (control testing, supervision over the attested production facility or over the certified (assessed) quality management system).

Testing methodology shall be established by the Ukrainian national certification authority, the State Committee of Ukraine on Technical Regulation and Consumer Policy.

3. Seeking the carrying out of mandatory certification of the gambling machine type conformity, an applicant shall file an application with any of the assigned (authorized) certification bodies, and in the absence of information on the presence of such, to the Ukrainian national certification authority which shall direct the application to the assigned (authorized) certification body. The form of the application for the performance of certification of gambling machines with monetary winnings, is provided in Annex 1.

4. Acting as an applicant for certification of type conformity may be the manufacturer or a legal entity resident in Ukraine, authorized by the manufacturer, acting by proxy. In the latter case, such legal entity must attach to the filed application, the documents certifying the manufacturer’s authorization to act on behalf thereof, and shall be required to provide for all the necessary conditions for the performance of the prescribed tests, of the production facility attestation, and of the quality control system certification (assessment), as well as to guarantee, on the manufacturer’s behalf, the production of gambling machines that are identical to the sample (samples) subjected to testing.

5. Attached to an application shall be:
   draft description of the gambling machine type. Model draft description of the gambling machine type is provided in Annex 2;
such technical documents and data covering all stages of design, manufacture, and application of the gambling machines concerned, as make it possible to assess their conformity with the requirements of these Rules. The list of documents and data to be attached to an application for certification of gambling machine type conformity, is provided in Annex 3.

6. While reviewing an application, a certification body shall:
   Register the application in a log book and create a separate certification of gambling machine type conformity file in which subsequently, all correspondence and documents related to the certification of the gambling machine type conformity, shall be kept;
   Carry out expert examination of the application and the documents and data attached to the application, as to the correctness of filling out, fullness of requisites, presence of required documents etc.;
   Prepare a decision on the filed application;
   Prepare a draft contract with the applicant for the carrying out of certification works.

7. The certification body concerned must within a period of no more than three working days from the date of the application’s registration, adopt a decision on the application.
8. Where as a result of reviewing the application and the attached documents and data, the certification body has established that the applicant failed to present all such documents and data as are necessary for the assessment of the submitted gambling machine type’s conformity, as listed in Annexes 2 & 3 to these Rules, the certification body shall notify the applicant, in writing, of suspending the processing of that application.

9. Where the certification body, in virtue of the results of reviewing the application and the attached documents and data, has adopted a decision on the impossibility of carrying out further stages of certification works in respect of the submitted gambling machine type, the applicant must be notified of that, in writing, complete with the reasons for the adoption of such decision.

Where the applicant fails, within a period of ten days after receiving the decision on suspending or refusing the carrying out of the further stages of certification works, to inform the certification body of the applicant’s intentions in regard of taking measures to eliminate the causes of the adoption by the certification body of such a decision, the processing of the application shall be discontinued.

10. Based on the application and the positive decision on the application, the certification body shall dispatch to the applicant, the contract for the organization and carrying out of the work package needed for the certification of the gambling machine type conformity, indicating the cost of these works in accordance with the Rules for the Determination of the Cost of Works for the Certification of Products and Services, approved by the Derzhstandart of Ukraine’s Order No. 100 of March 10, 1999, registered with the Ministry of Justice of Ukraine on March 31, 1999 under No. 194/3487. The contract must spell out the applicant’s obligations regarding the fulfillment of the conditions for the certification of the gambling machine type conformity, and the assurance of the conformity of the gambling machine characteristics as confirmed in the certificate.

Subject to the applicant’s consent, the certification body may carry out the works by individual stages, under individual contracts.

11. After signing the contract, the applicant shall pay the costs of the works provided for in the contract, or, subject to agreement of the parties, the costs of each individual stage.

12. Attestation of production facilities shall be undertaken with the purpose of assessing technical capacity of the manufacturer enterprise to ensure stable output of gambling machines satisfying the requirements of these Rules, and of issuing recommendations regarding the periodicity of control testing and the number of samples for carrying out the testing. Attestation of production facilities shall be carried out by certification bodies according to the procedure established for such works in DSTU 3414-96 “UkrSEPRO Certification System. Attestation of Production Facilities. Carrying out Procedure”. Attestation results shall be formalized in the form of a certificate of production facilities issued to the applicant.

13. Certification (assessment) of the quality management system shall be undertaken with the purpose of affirming that all the technical, administrative, and human factors affecting the conformity of gambling machines with the mandatory requirements, are under control, while such gambling machines as do not satisfy such requirements, are detected in a timely manner, and measures are continuously taken to prevent the output of such non-conforming gambling machines. Certification (assessment) of the quality management system shall be performed by the quality
management system certification bodies according to the procedure set out in DSTU 3419-96 “UkrSEPRO Certification System. Quality System Certification. Carrying out Procedure”. Quality management system certification (assessment) shall be finalized in the form of a quality management system certificate issued to the applicant.

14. Selection of type gambling machine samples shall be made by the applicant and formalized in the form of a samples selection report executed according to the form established by the appropriate certification body. One sample of each gambling machine type shall be selected for testing. The number of testing samples may be increased at the applicant’s option, in order to reduce the duration of testing.

15. Selected type samples must be complete, packed, and sealed. The applicant shall deliver the selected samples to the certification body and bring them back after testing at the applicant’s own expense.

16. Testing of the type gambling machine samples for the purpose of certification of type conformity, shall be carried out by the certification body to verify the conformity thereof with all the requirements set forth in section II of these Rules. Together with the samples, the applicant shall present all items needed for the carrying out of testing: gambling Hryvnia tokens, credit keys, external keypads, keys to all locks furnished with the appropriate tags etc., as well as a complete set of software carriers.

The time period for the testing shall be counted from the date of acceptance of the testing samples, and must not exceed 30 working days.

Testing results shall be formalized in a test record sheet.

17. Should the results prove negative, the certification body shall issue to the applicant, within a period of three days, a conclusion on the non-conformity of the gambling machine with the established requirements, complete with explanation of the negative results. Retesting may only be undertaken upon filing of new application.

18. Gambling machines samples delivered for testing, shall remain the applicant’s property.

19. In the presence of a production facility certificate or of a report containing a positive assessment of the quality management system, and subject to affirmation of the gambling machines’ conformity with the requirements established in section II of these Rules, the certification body shall within two days draw up a decision to issue the certificate of gambling machine type conformity.

20. If the certification body adopts a decision to refuse the issuance of type conformity certificate, such decision, complete with the mandatory explanation of the reasons for such refusal, shall be sent to the applicant within a period not in excess of three days from the date of adoption of such decision. In absence of appeal, the application shall be then annulled.

Re-certification of gambling machine type conformity may only be undertaken upon filing of a new application with the certification body concerned, complete with the properly documented applicant’s data on measures taken by the applicant to eliminate the causes that led to the adoption of the decision to refuse the issuance of type conformity certificate.
21. If a positive decision is adopted to issue a certificate of type conformity, the certification body shall within a period of three days draw up the certificate of type conformity that is entered in the Register, and approve the gambling machine type description, and notify the applicant.

A model certificate of type conformity is provided in Annex 4.

The certification body shall issue to the applicant the executed original copies of the certificate of type conformity and of the approved gambling machine type description.

22. The applicant, upon receiving the certificate of type conformity and after it is entered in the Register, shall be required to affix on each gambling machine of the certified type intended for use in Ukraine, the type conformity mark. The form of the type conformity mark is provided in Annex 5.

23. Where such changes are introduced in the gambling machine hardware as are likely to affect the indicators affirmed in the process of type conformity certification, the applicant shall be required to notify of that, in writing, the certification body, this latter to adopt a decision on the necessity of carrying out new testing or assessment of the status of the gambling machines’ production facilities.

24. Where the necessity arises to introduce to the approved type description an additional game program, the applicant must inform of that, in writing, the certification body concerned, simultaneously providing, as stipulated in Annex 2 to these Rules, the relevant information, the certification body to adopt a decision on carrying out testing solely as provided for in paragraphs 3 through 12, 18, and 20 through 26 of section II of these Rules.

25. Technical supervision over the certified gambling machine type in the process of production thereof shall be carried out by the certification body according to the procedure established in DSTU 3413-96 “UkrSEPRO Certification System. Products Certification Procedure”.

26. The certification body may adopt a decision to temporarily suspend or cancel the validity of a type conformity certificate in the case where:
   - non-conformity has been detected of the gambling machine with the certified type;
   - the manufacturer failed to abide by the acceptance rules, control and testing methods, or gambling machine marking requirements etc.;
   - such changes are introduced in the software or in the configuration of the gambling machine as may affect the conformity with the established requirements for the certified type, without prior consent of the certification body.

2. The Procedure for Carrying out Mandatory Primary Certification of a Gambling Machine Conformity with Type.

1. Mandatory primary certification of each gambling machine’s conformity with type shall be carried out by a certification body prior to putting gambling machines of a certified type into operation.

2. Mandatory primary certification of a gambling machine conformity with type shall comprise:
   - filing of an application for the certification;
   - considering the application and adopting a decision on the application;
   - identifying the gambling machine model;
   - analyzing the obtained results and adopting a decision on the possibility of issuing a certificate of the gambling machine conformity with type;
issuing the certificate of the gambling machine conformity with type.

3. For the carrying out of the primary certification of a gambling machine conformity with type, the applicant shall file an application with any of the assigned (authorized) certification bodies, and in the absence of information on the presence of such, to the Ukrainian national certification authority that shall direct the application to the appropriate assigned (authorized) certification body. A model application for carrying out the primary certification of a gambling machine conformity with type, is provided in Annex 6.

Acting as applicant for primary certification of a gambling machine may be a licensee.

4. In the process of considering an application, the certification body shall:
   - Register the application in a log book and create a separate file for the primary certification of the gambling machine’s conformity with type, subsequently to be used for keeping all correspondence and documents pertaining to the certification of this gambling machine model;
   - Carry out expert examination of the application as to the correctness of filling out, fullness of requisites etc.;
   - Prepare a decision on the filed application;
   - Prepare a draft contract with the applicant for the carrying out of certification works.

5. The certification body concerned must within a period of no more than three working days from the date of the application’s registration, adopt a decision on the application.

6. Where as a result of reviewing the application, the certification body has established that the performance of the further stages of works on primary certification of the gambling machine sample’s conformity with type, is not possible, the certification body shall notify the applicant, in writing, of suspending the processing of that application.

7. Where the applicant fails, within a period of ten days after receiving the decision on suspending or refusing the performance of the further stages of certification works, to inform the certification body of the applicant’s intentions in regard of taking measures to eliminate the causes of the adoption by the certification body of such a decision, the processing of the application shall be discontinued.

8. Based on the application and on the positive decision on the application, the certification body shall dispatch to the applicant, the contract for the organization and performance of the work package needed for the primary certification of the gambling machine’s conformity with type, indicating the cost of these works in accordance with the Rules for the Determination of the Cost of Works for the Certification of Products and Services, approved by the Derzhstandart of Ukraine’s Order No. 100 of March 10, 1999, registered with the Ministry of Justice of Ukraine on March 31, 1999 under No. 194/3487. The contract must spell out the applicant’s obligations regarding the fulfillment of the conditions for the certification of the gambling machine and the assurance of the conformity of the gambling machine characteristics as confirmed in the certificate.
Subject to the applicant’s consent, the certification body may carry out the works by individual stages, under individual contracts.

9. After signing the contract, the applicant shall pay the costs of works provided for in the contract, or, subject to agreement of the parties, the costs of each individual stage.

10. Primary certification of a gambling machine’s conformity with type shall be carried out by the certification body at the location agreed with the applicant, by way of identifying the gambling machine the certification of which has been applied for, with the purpose of confirming its being functionally identical and belonging to the previously certified and entered in the Register gambling machine type. The duration of primary certification must not exceed three working days. Primary certification results shall be formalized by an identification report according to the form established by the certification body concerned.

11. Conditional on positive results of primary certification, the certification body shall draw up a decision to issue the certificate of the gambling machine conformity with type.

If the certification body adopts a decision to refuse the issuance of the certificate of the gambling machine conformity with type, such decision, complete with the mandatory explanation of the reasons for such refusal, shall be sent to the applicant within a period not in excess of three days from the date of adoption of such decision, and the application shall be annulled.

Repeated primary certification of the gambling machine type may only be undertaken upon filing of a new application with the certification body concerned, complete with the properly documented applicant’s data on measures taken by the applicant to eliminate the causes that led to the adoption of the decision to refuse the issuance of the certificate of the gambling machine conformity with type.

12. If a positive decision is adopted to issue the certificate of the gambling machine conformity with type, the certification body shall draw up the certificate of the gambling machine conformity with type and enter it in the Register.

A model certificate of gambling machine conformity with type is provided in Annex 7.

The certification body shall issue the executed original copy of the certificate of the gambling machine conformity with type, to the applicant.

The certification body shall, following the entry of the certificate of the gambling machine conformity with type, in the Register, affix on the gambling machine concerned the mark of conformity with type, and shall seal the casing containing the software carriers, as stipulated in paragraph 22 of section II of these Rules.

The form of the mark of conformity with type is provided in Annex 8.

13. Where such repair works are required on gambling machines as call for the breaking of the seal, the gambling organizer concerned must within a period of three days, notify the relevant certification body, in writing, on the performed repair work, indicating the registration number of the gambling machine and its location.
Upon detecting any damage to the mark of conformity with type of a gambling machine and/or to the seal, the licensee must inform of the fact, without delay, the relevant certification body.

3. The Procedure for Carrying out Mandatory Certification of Gambling machines Put into Operation at Gambling Establishments in Ukrainian Territory Prior to Entry into Force of These Rules

1. Mandatory certification of such gambling machines as were put into operation in Ukrainian territory prior to entry into force of these Rules, and do not belong to a certified type, shall be undertaken with the purpose of assessing the conformity of each unit with all the requirements stipulated in section II of these Rules.

2. Mandatory certification of such gambling machines shall comprise:

   - filing of an application for certification;
   - consideration of the application, analysis of documents attached to the application, and adoption of a decision on the application;
   - identification and testing of each unit;
   - analysis of the obtained results and adoption of a decision on the possibility of issuing a certificate of the gambling machine conformity;
   - issuance of the certificate of the gambling machine conformity, and entering it in the Register.

3. Seeking the carrying out of the certification of each gambling machine unit’s conformity, an applicant shall file an application with any of the assigned (authorized) certification bodies, and in the absence of information on the presence of such, to the Ukrainian national certification authority which shall direct the application to the assigned (authorized) certification body. The form of the application for the performance of certification of gambling machines with monetary winnings, is provided in Annex 9.

4. Acting as an applicant for the certification of an individual gambling machine unit’s conformity, may be the licensee.

5. Attached to an application shall be:

   - A draft description of the gambling machine. Model draft description of the gambling machine is provided in Annex 10;
   - Such technical documents and data as would enable the assessment of the conformity of the gambling machine unit to the requirements of these Rules. The list of documents and data to be attached to an application for the certification of an individual gambling machine unit’s conformity, is provided in Annex 11.

6. While reviewing an application, a certification body shall:

   - Register the application in a log book and create a separate certification of individual gambling machine unit’s conformity file in which subsequently, all correspondence and documents related to the certification of this gambling machine unit, shall be kept;
   - Carry out expert examination of the application and the documents and data attached to the application, as to the correctness of filling out, fullness of requisites, presence of required documents etc.;
   - Prepare a decision on the filed application;
Prepare a draft contract with the applicant for the carrying out of the certification works.

7. The certification body concerned must within a period of no more than three working days from the date of the application’s registration, adopt a decision on the application.

8. Where as a result of reviewing the application, the certification body has established that the performance of the further stages of works on certification of the gambling machine unit’s conformity, is not possible, the certification body shall notify the applicant, in writing, of suspending the processing of that application.

9. Where the applicant fails, within a period of ten days after receiving the decision on suspending or refusing the carrying out of the further stages of certification works, to inform the certification body of the applicant’s intentions in regard of taking measures to eliminate the causes of the adoption by the certification body of such a decision, the processing of the application shall be discontinued.

10. Based on the application and the positive decision on the application, the certification body shall dispatch to the applicant, the contract for the organization and carrying out of the work package needed for the certification of the gambling machine conformity, indicating the cost of these works in accordance with the Rules for the Determination of the Cost of Works for the Certification of Products and Services, approved by the Derzhstandart of Ukraine’s Order No. 100 of March 10, 1999, registered with the Ministry of Justice of Ukraine on March 31, 1999 under No. 194/3487. The contract must spell out the applicant’s obligations regarding the fulfillment of the conditions for the certification of gambling machine type conformity, and the assurance of the conformity of the gambling machine characteristics as affirmed in the certificate.

Subject to the applicant’s consent, the certification body may perform the works by individual stages, under individual contracts.

11. After signing the contract, the applicant shall pay the costs of the works provided for in the contract, or, subject to agreement of the parties, the costs of each individual stage.

12. Identification of the gambling machine unit shall be carried out by the certification body in the presence of the applicant’s representative and formalized by an unit identification report according to the form established by the certification body.

13. The identified unit must be complete, packed, and sealed. The applicant shall deliver the unit to the certification body and bring it back after testing at the applicant’s own expense.

14. Testing of the gambling machine unit for the purpose of conformity certification, shall be carried out by the certification body to verify the conformity thereof with all the requirements set forth in section II of these Rules. Together with the samples, the applicant shall present all items needed for the carrying out of testing: gambling Hryvnia tokens, credit keys, external keypads, keys to all the locks furnished with the appropriate tags etc., as well as a complete set of software carriers.
The time period for the testing shall be counted from the date of acceptance of the unit to be tested, and must not exceed 30 working days.

Testing results shall be formalized by a test record sheet.

15. Should the results prove negative, the certification body shall issue to the applicant, within a period of three days, a conclusion on the non-conformity of the gambling machine with the established requirements, complete with the explanation of negative results. Retesting may only be undertaken upon filing of new application.

16. The gambling machine unit delivered for testing, shall remain the applicant’s property.

17. Subject to affirmation of the gambling machine unit’s conformity with the requirements established in section II of these Rules, the certification body shall draw up a decision to issue the certificate of the gambling machine conformity.

18. If the certification body adopts a decision to refuse the issuance of the gambling machine conformity, such decision, complete with the mandatory explanation of reasons for such refusal, shall be sent to the applicant within a period not in excess of three days from the date of adoption of such decision. In absence of appeal, the application shall be then annulled.

Re-certification of the gambling machine conformity may only be undertaken upon filing of a new application with the certification body concerned, complete with the properly documented applicant’s data on measures taken by the applicant to eliminate the causes that led to the adoption of the decision to refuse the issuance of the gambling machine conformity certificate.

19. If a positive decision is adopted to issue a certificate of the gambling machine conformity, the certification body shall within a period of three days draw up the certificate of conformity, to be entered in the Register, and approve the gambling machine type description, and notify the applicant.

A model certificate of type conformity is provided in Annex 12.

The certification body shall issue the executed original copies of the gambling machine conformity and of the approved gambling machine description to the applicant.

The certification body shall, following the entry of the certificate of the gambling machine conformity, in the Register, affix on the gambling machine concerned the conformity mark, and shall seal the casing containing the software carriers, as stipulated in paragraph 22 of section II of these Rules.

The form of the gambling machine conformity mark is provided in Annex 13.

**IV. Procedure for Carrying out Periodical Inspections of Gambling Machines in Operation**

1. Periodical inspections of gambling machines in operation shall be carried out by a certification body on an annual basis during the period of validity of the license for the organization of gambling with application of the gambling machines concerned.
2. In the course of such inspections, integrity shall be checked upon of marks and seals. The duration of an inspections must be set accounting for the number of machines and the location thereof, and must not exceed ten working days. The inspection shall be carried out at the location of the gambling machines. The inspection results shall be formalized by a report.

3. Should the results of the periodical inspection prove positive, the certification body shall affix on the gambling machine concerned the periodical inspection mark. The form of such mark is provided in Annex 14.

4. Should the results of the periodical inspection prove positive, the certification body shall affix on the gambling machine concerned the mark of gambling machine unfitness. The form of such mark is provided in Annex 15.

An unfit gambling machine’s certificate shall be annulled, and the gambling machine shall be removed from the Register, and must be withdrawn from operation by the organizer of gambling concerned.

5. Extraordinary inspections shall be undertaken in the following cases:
   - after the performance of repairs on a gambling machine;
   - where damage is detected to the seals, the conformity marks, or the periodical inspection mark;
   - in virtue of reasoned complaints.

V. Consideration of Disputed Matters

1. A certification body must assure confidentiality of information that constitutes professional and commercial secret.

2. In case of a disagreement with the certification body’s decision, the applicant may file a complaint with the certification body no later than within one month from the date of receipt of the notice on the adopted decision, or with a court of justice.

3. Such complaint shall be considered by the certification body’s appeals commission within a period of one month from the date of receipt thereof.

4. To undertake the consideration of a complaint, the appeals commission must no later than two weeks before the commission’s session, obtain from the certification body the following documents:
   - The applicant’s complaint;
   - The correspondence between the applicant and the certification body pertaining to the matter in dispute;
   - Records of the gambling machines testing;
   - Identification reports;
   - Samples or photographs of the gambling machines concerned;
   - Technical documents etc. (where needed).

5. The appeals commission shall consider the disputed matters in confidence. When a decision is adopted, only commission members must be present, in a body. The commission’s decision, in writing, shall be brought to the applicant's notice.

6. Should the applicant so wish, he/she shall be heard out at the appeals commission’s session.
7. In case of refusal to honor the complaint, the expenses related to the consideration thereof, shall be borne by the applicant. If the complaint is honored, the expenses related to the consideration thereof, shall be borne by the certification body.

8. If the appeal has been honored, the certification body shall be required to carry out the necessary works and to annul the decisions that had been appealed.

9. If the applicant disagrees with the decision of the certification body’s appeals commission, the applicant may contest such decision within a period of 10 days from the date of receipt of the decision, in the Commission of Appeals of the national certification authority.

10. If the applicant disagrees with the decision of the certification body’s appeals commission and/or with the decision of the national certification authority’s Commission of Appeals, the applicant may contest such decisions in court.
APPLICATION
for Carrying out Mandatory Certification of Conformity with Type of Gambling Machines with Monetary Winnings

1. ______________________________________________________________________
   (appellation, location, and EDRPOU identification code of the legal entity – manufacturer enterprise or a
   person authorized by such)
In the person of ___________________________________________________________________
   (surname, name, patronymic of the manager)
hereby requests the carrying out of mandatory certification of conformity with type of the gambling
machines ______________________________________________________________________
   (designation of type)
as required by the Rules for Mandatory Certification of Gambling Machines with Monetary
Winnings.

2. The Applicant hereby undertakes:
to comply with the terms and conditions of certification;
to assure the stability of such gambling machines’ characteristics as will be affirmed in the certificate;
to pay the costs of certification works as calculated in accordance with the Rules for the
Determination of the Cost of Works for the Certification of Products and Services, approved by the
Derzhstandart of Ukraine’s Order No. 100 of March 10, 1999, registered with the Ministry of
Justice of Ukraine on March 31, 1999 under No. 194/3487.

3. The documents and data attached to this application, fully reflect the principle of operation
and functioning of the gambling machines belonging to the type concerned. All gambling machines
of this type were manufactured according to the same technical documents and technology as the
sample presented for the certification.

Manager                                                     ___________              ____________________
   (signature)                            (initials, surname)

Chief Accountant                                    ___________              ____________________

Documents and Data to be Attached to an Application for Mandatory Certification of a Gambling Machine’s Conformity with Type

Documents required for carrying out the testing, must be executed in Ukrainian language.

1. Copies of the records of the testing for the safety and electromagnetic compatibility.

2. Operating instructions and service documents. Where the information listed below is absent in service documents, such information shall be additionally attached, to wit:
   - The gambling machine’s installation manual and rules of the game;
   - Description of all possible methods of connecting to the gambling machine (power supply, interface for outputting of statistical data etc.);
   - Layout description of the keypad used in the gambling machine, as well as the function of each key and of the combinations thereof;
   - Description of the gambling machine behavior following the switching off and subsequent switching on of power supply.

3. Comprehensive description of each game that may be played on the gambling machine, containing the following:
   - Manner in which the right to play is obtained with the help of tokens, coins, bills, and keys (for each game);
   - Description of the game course and of the options available;
   - Game stakes, including the minimum and maximum amounts;
   - Table of winnings showing game result amounts in certain game situations and for various stake amounts, as well as the game results probability;
   - Description of the additional games;
   - Winnings coefficients for each game.

4. Description of the type of device for insertion of money and for outputting of winnings, and of the possibility to change game tokens.

5. Description of meters, complete with the explanation of the intended use of each.

7. Carrier complete with the listing of the program (the program source code).

8. Documentary evidence of copyright to all the programs used in the gambling machine, or of the contracts for the assignment (in full or in part) of exclusive (property) rights to such programs.

9. The software manufacturer’s declaration on absence of such commands and algorithms as are not stipulated in operation or service documents.
