Foreword

GCC Standardization Organization (GSO) is a regional Organization which consists of the National Standards Bodies of GCC member States. One of GSO main functions is to issue Gulf Standards /Technical regulations through specialized technical committees (TCs).

GSO through the technical program of committee TC No.:12 "*Gulf TC of Cosmetics and Personal Care*" has updated the draft Gulf Standard No. 1943/2014 "*Safety Requirements of Cosmetics and Personal Care Products*", which cancels and replaces the last edition. The Draft Standard has been prepared by (United Arab Emirates).

This standard has been approved as a Gulf Standard by GSO Board of Directors in its meeting No. (),held on / / H, / / G.

COSMETIC PRODUCTS – SAFETY REQUIREMENTS OF COSMETIC AND PERSONAL CARE PRODUCTS

1. SCOPE AND FIELD OF APPLICATION

1.1 This gulf standard is concerned with the safety parameters and general requirements for all cosmetics and personal care products. An illustrative list of cosmetics is given in Annex 1 of this standard.

1.2 The standard specifies 6 functions for substances or preparations which may be cosmetic products, namely:

- To clean
- To perfume
- To change the appearance
- To protect
- To keep in good condition
- To correct body odours

1.3 The field of application of cosmetics is to one or more of the following:

- The epidermis
- The hair system
- The nails
- The lips
- The external genital organs
- The teeth
- The mucous membranes of the oral cavity

1.4 Products intended to come into contact with the mucous membranes include those used:

- In the vicinity of the eyes
- On the lips
- In the oral cavity
- On the external genital organs

1.5 A cosmetic product intended to come into contact with the mucous membranes does not include any cosmetic product that is only intended to come into brief contact with the skin. Besides, products that may come into brief, unintentional contact with the mucous membranes are included such as shampoos and shower gel.

3. TERMS AND DEFINITIONS

For purposes of this standard, terms and definitions below shall be applied:

3.1 Cosmetic and Personal Care Products

Any substance or mixture intended for use on external parts of the human body (epidermis, hair system, nails, lips and external genital organs) or with the teeth and the mucous membranes of the oral cavity with a view exclusively or mainly to cleaning them, perfuming them, changing their appearance, protecting them, keeping them in good condition or correcting body odors.

3.2 Substance

A chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition.

3.3 Mixture

A mixture or solution composed of two or more substances.

3.4 Sunscreen Product

Any preparation as, for example, cream, oil, gel, spray contains UV-filters and intended to be placed in contact with the human skin with a view exclusively or mainly to protecting it from UV radiation through absorbing, scattering or reflecting radiation.

3.5 Fragrance

Natural or synthetic substances(s) used solely to impart a pleasant smell to a cosmetic product and/or the body.

3.6 Nanomaterial

An insoluble or bio-persistent material, intentionally manufactured with one or more external dimensions, or an internal structure, on the scale from 1 to 100 nm.

3.7 Preservative

A substance which may be added to a cosmetic product for the primary purpose of inhibiting the development of micro-organisms in the cosmetic product(s).

3.8 Colorant

A Substance which may be added to a cosmetic product for the primary purpose of colouring the cosmetic product, the body as a whole or certain parts thereof, by absorption or reflection of visible light. Precursors of oxidative hair colorants shall be deemed colorants.

3.9 UV-Filter

A substance which are exclusively or mainly intended to protect the skin against certain UV radiation by absorbing, reflecting or scattering UV radiation

3.10 Manufacturer

A person who manufactures a cosmetic product or has such a product designed or manufactured, and markets that cosmetic product under his name or trademark.

3.12 Importer

A person established within the Community, who places a cosmetic product from a third country on the Community market.

3.13 Distributor

A person in the supply chain, other than the manufacturer or the importer, who makes a cosmetic product available on the Community market.

3.14 Making available on the market

Any supply of a cosmetic product for distribution, consumption or use on the Community market in the course of a commercial activity, whether in return for payment or free of charge.

3.15 Single application products

Products intended to be used only once immediately after opening.

3.16 Free Samples

Products that made freely available to the end user.

3.17 Impracticable Packaging Products

Products that is impossible for practical reasons to label the information on their packaging or container.

3.18 Non-pre-packaged products

products that are packaged at the point of sale, containing similar or different products with similar or different functions.

3.19 Multi-packs

Pre-packages normally sold as a number of items.

4. GENERAL SAFETY REQUIREMENTS

Cosmetic and personal care products shall fulfill the following requirements:

- 4.1 The products shall be completely free from any ingredients that are not aligned with halal practice and rules e.g. Pork, lard.
- 4.2 They shall be safe for human health when used under normal or reasonably foreseeable conditions of use.
- 4.3 They shall be homogenous, stable and their properties shall not change during its shelf life when stored and used as per the instructions.
- 4.4 Cosmetic and personal care products shall not contain any of the following:
 - 4.4.1 Prohibited substances which listed in Annex II.
 - 4.4.2 Restricted substances which are not used in accordance with the restrictions laid down in Annex III.
 - 4.4.3.1 Colorants other than those listed in Annex IV and colorants which are listed there but not used in accordance with the conditions laid down in that Annex, except for hair coloring products referred to in (4.4.3.3).
 - 4.4.3.2 Without prejudice to points (b),(d),(i) (e) and (i), substances which are listed in Annex IV but which are not intended to be used as colorants, and which are not used in accordance with the conditions laid down in that Annex.

GSO 1943/2014

Gulf Standard

4.4.3.3 Hair coloring products shall not contain colorants intended to color the hair, other than those listed in Annex IV and colorants intended to color the hair which are listed there but not used in accordance with the conditions laid down in that Annex.

4.4.4.1 Preservatives other than those listed in Annex V and preservatives which are listed there but not used in accordance with the conditions laid down in that Annex.

4.4.4.2 Without prejudice to points (b), (c)(i) and (e)(i), substances listed in Annex V but which are not intended to be used as preservatives, and which are not used in accordance with the conditions laid down in that Annex.

4.4.4.1 UV-filters other than those listed in Annex VI and UV-filters which are listed there but not used in accordance with the conditions laid down in that Annex.

4.4.4.2 without prejudice to points (b), (c) (i) and (d) (i), substances listed in Annex VI but which are not intended to be used as UV-filters and which are not used in accordance with the conditions laid down in that Annex.

4.5 Sunscreen products should provide equal degree of protection against UVB and UVA radiation to what stated on the label. The degree of protection should be measured using standardized, reproducible testing methods and take photo-degradation into account. The product(s) shall pass the applicable tests as mentioned in article 2. 16.

4.6 The manufacture of cosmetic products shall comply with good manufacturing practice with a view to ensuring the objectives of Article 4.2. Compliance with good manufacturing practice shall be presumed where the manufacture is in accordance with the relevant harmonized standards such as GSO ISO 22716.

4.7 Cosmetics and personal care found in aerosol dispensers shall follow the standard in the article 2.12.

4.8 The following microbiological limits mentioned in table 1 shall apply.

Types Of Micro-organisms	Products specifically intended for children under three years of age, the eye area or the mucous membranes	Other products
Total Aerobic Mesophilic Microorganisms (Bacteria plus yeast and mould)	$\leq 1 \times 10^2$ CFU per g or ml $\leq 1 \times 10^3$ CFU per g or mlb	$\leq 1 \times 10^2$ CFU per g or ml $\leq 1 \times 10^3$ CFU per g or mlb

Table1. Microbiological Limits for Cosmetics and Personal Care Products

4.9 The non-intended presence of small quantity of a prohibited substance, stemming from impurities of natural or synthetic ingredients, the manufacturing process, storage, migration from packaging, which is technically unavoidable in good manufacturing practice, shall be permitted provided that such presence is in conformity with Article 4.2. But In the case of its presence as an impurity, they should not exceed the following limits:

- Lead: 10 ppm
- Arsenic: 3 ppm
- Cadmium: 3 ppm
- Mercury: 3 ppm
- Antimony: 5 ppm

4.9.1 It is important to note that occurrences of heavy metals above these limits will be evaluated on a case-by-case basis. Products with values above these limits may undergo an assessment to determine the level of risk posed by the product, which would then determine the appropriate enforcement action according to the National Standardization Body (NSB).

5. GENERAL MARKING AND LABELLING REQUIRMENTS

All cosmetic and personal care products shall bear the following information in indelible, easily legible and visible lettering:

5.1 The name of the product and the name of trade mark.

5.2 The name and address of manufacturer or supplier or distributor. The name and the address must be sufficient to identify the undertaking.

5.3 Country of origin of the product.

5.4 Nominal content of the product. The nominal quantities shall be expressed in units of weight or volume. The nominal content information is exempted in the following cases: for products containing less than 5ml or 5g, single-application products, free samples.

5.5 The date which the cosmetic product, stored under appropriate conditions, will continue to fulfil its initial function and, in particular, will remain in conformity with article 4.2. On this basis two different situations have to be considered:

5.5.1 A product which is likely to deteriorate up to and including 30 months from the date of manufacture shall declare on the container and the packaging the date of minimum durability. The date of minimum durability shall be clearly expressed and preceded by the mention “best used before the end of” or by the symbol (1), specified in Annex VII of this standard. The date shall consist either of the month and year or the day, month and year, in that order. If necessary, the date shall be supplemented by an indication of the conditions which must be satisfied to guarantee the stated durability.

5.5.2 A product which is likely to deteriorate after 30 months from the date of manufacture shall declare the period of time after opening for which the product is safe and can be used without any harm to the consumer. The period after opening shall be indicated by the symbol (2) specified in Annex VII, together with an indication of the period of time in months or years shown as a number, which can be located inside or outside the symbol. The mention of the period after opening seems not to be relevant when there is:

- a. No physical opening of the product as is the case for products presented in containers, where there is no possibility of contact between the product in the container and the external environment (e.g. sealed pressurized containers)
- b. No period after opening, as is the case for single-use products.
- c. Products with a low microbiological risk such as those with: $\text{pH} \geq 10.0$, $\text{pH} \leq 3.5$, high alcohol content (e.g. perfumes, eau de cologne, ...)

5.6 Conditions of use, Warning Statements and precautionary information shall clearly expressed on the label and the following should be considered:

5.6.1. Conditions of use and warnings for a range of ingredients are specified in the Annexes III to VI column i. Additionally any other information deemed necessary for the safe use or disposal of the product must also be provided.

5.6.2 These requirements also apply to products intended for professional use, in hairdressing in particular, and careful consideration should be given as to how the product is used and whether there is increased risk due to prolonged exposure or more unusual conditions of use.

5.6.3 Where it is impossible for practical reasons to print this information on the label, the information shall be mentioned on an enclosed or attached leaflet, label tape, tag or card. This shall be referred to either by abbreviated information or by the “hand-in-book” symbol (3) in annex VII, which must appear on the container or packaging.

5.7 Batch Number or Lot Code. A code which enables the manufacturer or supplier to identify the batch in which the product was manufactured must be marked on both the primary container and outer packaging. If the product is not made in a batch, then the code should enable the date and place of manufacture to be identified. Where it is impossible for reasons of size for the lot code to appear on both the primary container and outer packaging, it may appear on the outer packaging alone.

5.8 Product Function. The function of the cosmetic product should be clearly printed on the container and on the packaging, unless it can be spontaneously and obviously deduced from a combination of:

- The product presentation (shape, size and volume) e.g. lipstick
- Its name (e.g. cream) or trademarks
- Its function claims

5.9 List of Ingredients may be printed on the packaging only. The list shall be preceded by the term 'ingredients'. For the purpose of this Article, an ingredient means any substance or mixture intentionally used in the cosmetic product during the process of manufacturing. The following shall not, however, be regarded as ingredients:

- Impurities in the raw materials used
- Subsidiary technical materials used in the preparation of the cosmetic product but not present in the final product.

5.9.1 Perfume and aromatic compositions and their raw materials shall be referred to by the terms 'parfum' or 'aroma'. Moreover, the presence of substances, the mention of which is required under the column 'Other' in Annex III, shall be indicated in the list of ingredients in addition to the terms parfum or aroma.

5.9.2 The list of ingredients shall be established in descending order of weight of the ingredients at the time they are added to the cosmetic product. Ingredients in concentrations of less than 1 % may be listed in any order after those in concentrations of more than 1 %.

5.9.3 All ingredients present in the form of nanomaterials shall be clearly indicated in the list of ingredients. The names of such ingredients shall be followed by the word 'nano' in brackets.

5.9.4 Colorants other than colorants intended to colour the hair may be listed in any order after the other cosmetic ingredients. For decorative cosmetic products marketed in several colour shades, all colorants other than colorants intended to colour the hair used in the range may be listed, provided that the words 'may contain' or the symbol '+/-' are added. The CI (Colour Index) nomenclature shall be used, where applicable.

5.9.5 An ingredient should be identified by its common name that is its INCI name, as listed in the common ingredients nomenclature of the European Union. In the absence of an INCI name, any of the following means of identification may be used: chemical name; European Pharmacopoeia name; International non-proprietary name as recommended by the World Health Organization; EINECS number, IUPAC nomenclature or CAS identification reference; or colour index number.

5.9.6 Where it is impossible for practical reasons to print this information on the label, the information shall be mentioned on an enclosed or attached leaflet, label tape, tag or card. This shall be referred to either by abbreviated information or by the "hand-in-book" symbol (3) in annex VII, which must appear on the container or packaging. Where it is impracticable to label that abbreviated information or the symbol, they may be omitted.

5.9.7 For cosmetics and personal care that are supplied in neither a container nor packaging and whose size, shape or texture makes it impractical to provide ingredient information as detailed above, the information may be given on a notice or leaflet in close proximity to the product offered for sale. In this case, the hand-in-book symbol is not needed on the package.

5.10 The information required by (Article 5.1 to 5.8) must appear on the label of both the container and the packaging of each individual cosmetic product.

5.11 The requirements in article (5.1 to 5.5) shall be in Arabic and/or English Languages. However the following requirements must be presented in both Arabic and English Languages on the products:

- Product function and/or use
- Warnings instructions and precautionary information
- Necessary storage instructions for safe use

6. SPECIFIC MARKING AND LABELLING REQUIREMENTS

6.1 For toilet soap that are supplied neither in a container or packaging, the name and address of the manufacturer or supplier and the batch code are required to be given on in any of the following means:

- The soap itself (but only required to be indelible until it has been put into use)
- The packaging in which it is exposed for supply
- The container in which it was packed before being exposed for supply

6.2 Gift sets and kits that contain multiple cosmetics and personal care products need to list the ingredients of all the cosmetics products comprising the kit on the outer packaging such that they are available to the consumer at the time of purchase of the product. Gift baskets that have multiple products and wrapped decoratively may have a card affixed to them, since this would be considered as an ornamental container.

6.3 Hotel Amenities are subject to all of the requirements of this standard. However, full use can be made of the exemptions to ingredient labelling given for difficult shapes and small packs. For example, it is acceptable for the ingredient information to be given on a leaflet or card which can be placed close to the product where the standard allow this.

6.4 Cosmetic and personal care products that are supplied as Multi-packs, ingredient labelling can be dealt with as follows:

- Where the ingredient labelling is on the outer packaging, the ingredients for each product may be separately listed or combined into one list.
- Where labelling on the outer packaging is impossible for practical reasons or impracticable for reasons of size or shape, the provisions detailed in (articles 6.9.6 and 6.9.7) shall apply.
- If the products within the multi-pack have containers which are individually labelled or printed with an ingredient list, there is no requirement for a separate leaflet, label, tape, tag or card.
- In the case of transparent packaging where the ingredient labelling of the individual products is clearly visible, separate labelling is not required.

7. PRODUCT CLAIMS

- 7.1 Claims on cosmetic and personal care products shall fall under the cosmetic definition.
- 7.2 Pictures and illustrations that are inconsistent with the prevailing social customs and values of the GCC Countries shall not appear on the labels.
- 7.3 The information appearing on the label shall be valid and authentic and shall be based on scientific and laboratory evidence.

8. PACKAGING

- 8.1 The cosmetic product shall be packed in appropriate containers which are clean, do not interact with the cosmetic product or vice versa, and it shall be ensured that containers are properly closed.
- 8.2 Cosmetic and personal care products packed in glass containers shall meet the requirements of article 2.17.
- 8.3 The packaging of cosmetics and personal care products shall be designed so that, under conditions specified by the manufacturer for storage, transport and handling, it protects against damage and detrition and it does not adversely affect the product.

9. RULES FOR ACCEPTANCE AND REJECTION

- 9.1 Each consignment of cosmetics and personal care products must be accompanied with a certificate issued either from National Standardization Body (NSB) or from any other official body approved by NSB showing that the consignment is complying with this gulf standard.

Annex I

Illustrative List of Cosmetics

The following list is not exhaustive but is provided by way of example:

- (12) For use as a preservative, see Annex V, No 9.
- (13) For use as a preservative, see Annex V, No 23.
- (14) For use as a preservative, see Annex V, No 8.

ANNEX IV

LIST OF COLORANTS ALLOWED IN COSMETIC PRODUCTS

Preamble

Without prejudice to other provisions in this Regulation, a colorant shall include its salts and lakes and when a colorant is expressed as a specific salt, its other salts and lakes shall also be included.

Reference number	Substance identification					Conditions			Wording of conditions of use and warnings
	Chemical Name	Colour index Number/Name of Common Ingredients Glossary	CAS number	EC number	Colour	Product type, Body parts	Maximum concentration in ready for use preparation	Other	
a	b	c	d	e	f	g	h	i	j
1	Sodium tris(1,2-naphthoquinone 1-oximato-O,O')ferrate(1-)	10006			Green	Rinse-off products			
2	Trisodium tris[5,6-dihydro-5-(hydroxyimino)-6-oxonaphthalene-2-sulphonato(2-)-N5,O6]ferrate(3-)	10020			Green	Not to be used in products applied on mucous membranes			
3	Disodium 5,7-dinitro-8-oxidonaphthalene-2-sulphonate and its insoluble barium, strontium and zirconium lakes, salts and pigments	10316			Yellow	Not to be used in eye products			
4	2-[(4-Methyl-2-nitrophenyl)azo]-3-oxo-N-phenylbutyramide	11680			Yellow	Not to be used in products applied on mucous membranes			
5	2-[(4-Chloro-2-nitrophenyl)azo]-N-(2-chlorophenyl)-3-oxobutyramide	11710			Yellow	Not to be used in products applied on mucous membranes			
6	2-[(4-Methoxy-2-nitrophenyl)azo]-3-oxo-N-(o-tolyl)butyramide	11725			Orange	Rinse-off products			
7	4-(Phenylazo)resorcinol	11920			Orange				
8	4-[(4-Ethoxyphenyl)azo]naphthol	12010			Red	Not to be used in products applied on mucous membranes

LIST OF PRESERVATIVES ALLOWED IN COSMETIC PRODUCTS

Preamble

1. For the purposes of this list:

— 'Salts' is taken to mean: salts of the cations sodium, potassium, calcium, magnesium, ammonium and ethanolamines; salts of the anions chloride, bromide, sulphate, acetate.

— 'Esters' is taken to mean: esters of methyl, ethyl, propyl, isopropyl, butyl, isobutyl, phenyl.

2. All finished products containing formaldehyde or substances in this Annex and which release formaldehyde must be labelled with the warning 'contains formaldehyde' where the concentration of formaldehyde in the finished product exceeds 0,05 %.
