FOREWORD

This draft Malawi standard is a second edition of MS 178:1988, *Country wines – Specification*. The revision of this Malawi standard has been prepared after consideration of several issues that need to be amended and re-addressed in order to incorporate technological advances. This draft Malawi standard has been prepared by MBS/TC 11, the Technical Committee on *Beverages* to provide requirements for country wines.

In preparing this draft Malawi standard reference was made to the following standards:

East African Standard, EAS 138:2014, Still table wine – Specification.

Indian Standard, IS 7058:2005, Table wines - Specification.

Acknowledgement is made for the use of the above standards.

TECHNICAL COMMITTEE

This draft Malawi standard was prepared by MBS/TC 11, the Technical Committee on *Beverages*, and the following companies, organizations and institutions were represented:

Blantyre Hotels Limited;

Blantyre Water Board;

Carlsberg (Malawi) Limited;

Chibuku Products Limited;

Consumers Association of Malawi;

Dairibord Malawi Limited;

Linga Fine Foods and Winery;

Malawi Bureau of Standards;

Mkombezi Wine Cooperatives;

Peoples Trading Centre; and

The Malawi Polytechnic (University of Malawi).

NOTICE

This draft standard shall be reviewed every five years, or earlier whenever it is necessary, in order to keep abreast of progress. Comments are welcome and shall be considered when the standard is being reviewed.

DRAFT MALAWI STANDARD

Country wines – Specification

1 SCOPE

This draft Malawi standard specifies requirements and methods of sampling and test for country wines prepared from fruits.

2 NORMATIVE REFERENCES

The following standards contain provisions, which through reference in this text, constitute provisions of this Malawi standard. All standards are subject to revision and, since any reference to a standard is deemed to be a reference to the latest edition of that standard, parties to agreements based on this standard are encouraged to take steps to ensure the use of the most recent edition of the standard indicated below. Information on current valid national and international standards can be obtained from the Malawi Bureau of Standards.

MS 19: Labelling of prepacked foods – General standard;

MS 21: Food and food processing units – Code of hygienic conditions;

MS 107: Alcoholic beverages – Methods of test;

MS 237: Food additives – General standard;

MS 302: Contaminants and toxins in foods – General standard;

AOAC Official Method 925.35: Determination of sucrose in fruits and fruit products;

ISO 4832: Microbiology of food and animal feeding stuffs – Horizontal method for the enumeration of coliforms – Colony-count technique;

ISO 4833-1: Microbiology of the food chain – Horizontal method for the enumeration of micro-organisms – Part 1: Colony-count at 30 $^{\circ}$ C – Pour plate technique; and

ISO 5519: Fruits, vegetables and derived products – Determination of sorbic acid content.

3 TERMS AND DEFINITIONS

For the purposes of this draft standard, the following terms and definitions shall apply;

3.1

country wines

wines obtained by alcoholic fermentation of fresh or processed fruits or fruit juice or sugar mixed with fruits, vegetables, flowers and herbs. These wines are also known as home wines.

3.2

dry wine

wine in which practically all the sugar has been converted by fermentation into alcohol to a maximum sugar content of 4 g/l as sucrose

3.3

extraneous matter

includes inorganic matter such as sand, glass, metal, gravel, dirt, pebbles, stones, lumps of earth, clay and mud and organic matter such as chaff, straw, weed seeds and fruit matter, insects or insects fragments, rodent hairs or any other foreign matter

3.4

medium sweet wine

wine which contains unfermented sugar in a range of 4 to 45 g/l as sucrose

3.5

red wine

wine obtained from fruit juice, usually grapes in which the skins, and stems are present during fermentation in order to impart the red colouration arising from anthocyanin pigments extracted by the alcohol being produced

3.6

rose wine

wine produced by the normal alcoholic fermentation of fruits juice, usually grapes, in which the colouring matter of skins and stems are removed before fermentation, yet retaining the pink colouration

3.7

sweet wine

wine which contains some unfermented sugar to a minimum level of 45 g/l as sucrose

3.8

white wine

wine produced by the normal alcoholic fermentation of fruit juice, usually grapes without the pigment extraction

3.9

wine

alcoholic beverage obtained by fermentation of fresh or processed fruits or fruit juice (usually grape fruits or grape juice)

4 TYPES

This standard covers the following types of country wines:

- a) dry;
- b) medium; and
- c) sweet.

5 ESSENTIAL COMPOSITION AND QUALITY FACTORS

5.1 General requirements

Country wine shall:

- **5.1.1** possess the characteristic taste and aroma associated with the type of wine;
- 5.1.2 be free from cloudiness and suspended/particulate matter;
- **5.1.3** be so produced as to prevent spoilage under normal storage conditions;
- **5.1.4** have typical organoleptic characteristics of their raw material;
- 5.1.5 have no artificial colour added to give or amplify colour; and
- **5.1.6** be free from any extraneous matter.

5.2 Red wine shall derive the red colour from natural pigments; mainly anthocyanins present in fruits. No colour shall be added to give or amplify the red colour. The wine shall derive its colour solely from the grapes. The wine having pink colour shall be marked as rose wine and not red wine.

5.3 Specific quality requirements

Country wines shall comply with the quality requirements of Table 1.

S/N	Characteristic	Requirement	Test method		
1	Ethyl alcohol content, %	7 –16.5			
2	Total solids, g/l	40 – 150			
3	Total acids, as tartaric acid, g/l	4.0 - 10	MS 107		
4	Volatile acids, as acetic acid, g/l, max.	1.0	1.0		
5	Total sugar, as sucrose, g/l				
	Dry wine	<4			
	Medium sweet wine	4 – 45	4 – 45 AOAC 925.35		
	Sweet wine	>45			
6	рН	3.0 - 4.0	3.0 – 4.0 MS 107		
7	Sorbic acid, mg/kg, max.	1000 ISO 5519		1000 ISO 5519	
8	Free sulfur dioxide, mg/kg, max.	50	MC 107		
9	Total sulfur dioxide, mg/kg, max.	250	- MS 107		

Table 1 – Quality requirements for country wine

5.4 Microbiological limits

Country wine shall comply with limits for micro-organisms specified in Table 2.

 Table 2 – Microbiological limits for country wine

1	2	3	4
S/N	Organism	Limit	Test method
1	Coliforms, cfu/ml	Nil	ISO 4832
2	Total plate count, cfu/ml, max.	100	ISO 4833-1

6 FOOD ADDITIVES

The food additives complying with MS 237 shall be used in the production of country wines.

7 CONTAMINANTS

7.1 Heavy metals

The products covered by this standard shall comply with the maximum levels of heavy metals and toxic substances prescribed in MS 302.

7.2 Pesticide residues

All the raw materials used in the production of country wines shall comply with the maximum residue limits for pesticides as established by the Codex Alimentarius Commission.

8 HYGIENE

The product covered by the provisions of this draft standard shall be prepared and handled in accordance with the requirements set out in MS 21.

9 PACKAGING AND LABELLING

9.1 Packaging requirements

Country wine shall be packaged in suitable food grade containers. Country wine shall be packaged for bulk delivery and storage in containers that shall prevent contamination of the product and preserve its safety and quality.

9.2 Labelling requirements

In addition to the requirements of MS 19, the following specific provisions shall apply:

- a) **C**ommon name as 'wine' preceded by the fruit name where the wine is produced from other fruit other than grape;
- b) Name, physical location and address of manufacturer;
- c) Ethyl alcohol content, % by volume,;
- d) The net contents shall be declared by volume in millilitres or litres;
- e) List of ingredients in descending order of proportion by mass;
- f) Date of manufacture;
- g) Batch identification number/code;
- h) Country of origin; and
- i) Statutory warnings.

10 SAMPLING AND METHODS OF TEST

10.1 The products covered by the provisions of this draft standard shall be sampled as prescribed in MS 107.

10.2 The product shall be tested using appropriate standard methods declared in this draft standard.

THE MALAWI BUREAU OF STANDARDS

The Malawi Bureau of Standards is the standardizing body in Malawi under the aegis of the Ministry of Industry and Trade. Set up in 1972 by the Malawi Bureau of Standards Act (Cap: 51:02), the Bureau is a parastatal body whose activities aim at formulating and promoting the general adoption of standards relating to structures, commodities, materials, practices, operations and from time to time revise, alter and amend the same to incorporate advanced technology.

CERTIFICATION MARK SCHEME

To bring the advantages of standardization within the reach of the common consumer, the Bureau operates a Certification Mark Scheme. Under this scheme, manufacturers who produce goods that conform to national standards are granted permits to use the Bureau's "Mark of Quality" depicted below on their products. This Mark gives confidence to the consumer of the commodity's reliability.
