COMMISSION IMPLEMENTING REGULATION (EU) 2018/1533
of 12 October 2018
concerning the authorisation of sodium alginate as a feed additive for cats, dogs, other non-food-producing animals and fish and potassium alginate as a feed additive for cats and dogs

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition (1), and in particular Article 9(2) thereof,

Whereas:

(1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.

(2) In accordance with Article 7 of Regulation (EC) No 1831/2003 an application was submitted for the authorisation of potassium alginate.

(3) Article 10 of Regulation (EC) No 1831/2003 provides for the re-evaluation of additives authorised pursuant to Council Directive 70/524/EEC (2). Sodium alginate was authorised without a time limit by Directive 70/524/EEC as feed additive for fish, pets and other non-food-producing animals. The additive was subsequently entered in the Register of feed additives as existing product, in accordance with Article 10(1) of Regulation (EC) No 1831/2003.

(4) In accordance with Article 10(2) of Regulation (EC) No 1831/2003 in conjunction with Article 7 thereof, an application was submitted for the re-evaluation of sodium alginate as feed additive for pets and other non-food-producing animals and fish.

(5) The applications concern the authorisation of potassium alginate as a feed additive for cats and dogs, and sodium alginate as a feed additive for cats, dogs, other non-food-producing animals and fish, to be classified in the additive category 'technological additives'. Those applications were accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.

(6) The European Food Safety Authority ('the Authority') concluded in its opinion of 5 July 2017 (3) that, under the proposed conditions of use, potassium alginate and sodium alginate do not have an adverse effect on animal health, human health or the environment. The Authority also concluded that the potassium alginate and sodium alginate concerned are effective as stabilisers, thickeners, gelling agents and binders. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additive in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003.

(7) The assessment of the additives concerned shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of additives should be authorised as specified in the Annex to this Regulation.

(8) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1
Authorisation

The additives specified in the Annex, belonging to the additive category 'technological additives' and to the functional group 'stabilisers', 'thickeners', 'gelling agents' and 'binders' are authorised as additives in animal nutrition, subject to the conditions laid down in that Annex.

Article 2

Transitional measures

Sodium alginate specified in the Annex and premixtures containing that additive, which are produced and labelled before 4 May 2019 in accordance with the rules applicable before 4 November 2018 may continue to be placed on the market and used until the existing stocks are exhausted.

Feed materials and compound feed containing sodium alginate specified in the Annex which are produced and labelled before 4 November 2019 in accordance with the rules applicable before 4 November 2018 may continue to be placed on the market and used until the existing stocks are exhausted if they are intended for food producing animals.

Feed materials and compound feed containing sodium alginate specified in the Annex which are produced and labelled before 4 November 2020 in accordance with the rules applicable before 4 November 2018 may continue to be placed on the market and used until the existing stocks are exhausted if they are intended for non-food-producing animals.

Article 3

Entry into force

This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 12 October 2018.

For the Commission

The President

Jean-Claude JUNCKER
