- : Commodities for which MRLs are to be lowered or deleted.
- : Commodities for which MRLs are to be increased or newly set.

* Shaded figures indicate provisional MRLs.

* Diagonal line means deletion of a food category to which an MRL applies.

Note: The residue definition is Spectinomycin only.

** Food categories "Sheep, muscle", "Sheep, fat", "Sheep, liver", "Sheep, kidney" and "Sheep, edible offal" will be abolished and integrated into "Other terrestrial mammals, muscle", "Other terrestrial mammals, fat", "Other terrestrial mammals, liver", "Other terrestrial mammals, kidney" and "Other terrestrial mammals, edible offal", followed by the current food category system for MRLs for agricultural and veterinary chemicals in Japan.

※ Not the uniform limit of 0.01 ppm but the regulation that foods shall not contain any antibiotics or chemically synthesized substances will be applied to the commodities for which current MRLs are to be deleted, since this substance is considered to be an antibiotic or chemically synthesized antibacterial substance.
