

Draft amendment of the Ordinance for Enforcement of
Fertilizer Regulation Act with respect to deregulating
requirements of cultivation tests

(1) In addition to by-products originated from non-ferrous metals and chemical, by-products from food industry has recently been included in the list of available components of 'By-product fluid nitrogen fertilizer'.

(It was notified as G/TBT/N/JPN/569.)

(2) As the fermented by-products from food industry, which is used for components of 'By-product fluid nitrogen fertilizer', are proved to be harmless to plants, sphere of fertilizer types requiring cultivation tests is to be deregulated so that cultivation tests are not required for by-product fluid nitrogen fertilizers composed of fermented by-products upon filing application form for registration.
