

Draft amendment of the Ministerial Notification No.701 of the Ministry of Agriculture, Forestry and Fisheries of 1984

Current fertilizer labelling, forces operators to change labels on packaging materials even with a minor change in manufacturing process, leading to increase in production cost. Thus in order to deregulate fertilizer labelling requirements aiming to reduce unnecessary package change, following revisions are to be implemented:

Labelling related to animal-derived protein (other than cattle) and bovine-derived protein are to be unified.
