

# Summary of the Amendment of the Food Labelling Standards (aseptic filling Tofu, fungicide (fludioxonil) and Bologna sausage)

## 1. Targets of the revision of Food Labelling Standards

- Aseptic filling Tofu
- Fungicide (fludioxonil)
- Bologna sausage

## 2. Summary of the Amendment

### ➤ Aseptic filling Tofu

Considering the assessment of the Effect of Food on Health (Notice of the chairman of Food Safety Commission, dated 23 January 2018), apart from conventional Tofu which needs to be chilled, we'll establish new food labelling standards that covers Tofu which can be stored at room temperature.

#### 【Amendment clause】

Appended Table 19 (Individual mandatory label of the general processed foods) etc.

### ➤ Fungicide(fludioxonil)

About fungicide (including fludioxonil), the name of use and the name of substance are mandated to be written together. We'll partially revise the Food Labelling Standards due to expansion of the use of fludioxonil.

#### 【Amendment clause】

Appended Table 24 (Individual mandatory labelling of the fresh foods) etc.

### ➤ Bologna sausage

“Mortadella Bologna” is planned to be protected based on the Act on Protection of the Names of Specific Agricultural, Forestry and Fishery Products and Foodstuffs. We'll partially revise the Food Labelling Standards so that “Mortadella Bologna” can be labelled “Bologna sausage”.

#### 【Amendment clause】

Standard Appended Table 3 (the meanings of the terms on the standards)

### 3. Effective Date

This Amendment comes into effect as of the date of its promulgation.

The date of promulgation is to be determined.
