Batch-by-Batch Inspection (Type Approval) or Registration of Product Certification (RPC) Scheme (Module II + III)

- **Registration of Product Certification (RPC) Scheme**

Under this procedure, manufacturers must have their products type-tested by the BSMI or designated testing laboratories recognized by the BSMI (Module II) before applying for registration of their products. Manufacturers or importers will also be required to ensure by declaration (Module III) that all products made at their manufacturing facilities are in conformity with the prototypes submitted for type testing in Module II.

Products will be allowed to use the Commodity Inspection Mark, the letter “R” and the

identification number given by the BSMI, after they are certified and registered with the BSMI. These products can then pass through the customs directly without any further inspection. The application fee and the annual fee for RPC are NT\$5,000 and NT\$2,000 respectively, for each type of product, and a RPC certificate is valid for three years.
