

The Outline of Proposed Amendment to Ministerial Ordinance

1 Item

Ordinance for Enforcement of the Radio Act etc.

2 Amendment to Ministerial Ordinance

Ordinance for Enforcement of the Radio Act

Regulations for Radio Equipment

3 Reasons for amendment

The Power Line Communication is expected to be one of the effective means of constructing an IoT infrastructure such as sensor information collection in a factory where wireless communication is difficult.

To meet the market demand, advanced systems on Power Line Communication will be introduced, and service spaces of Power Line Communication will be expanded.

4 Outline of the amendment

·The upper limit of the voltage on power line communication is changed from 200V to 600V.

·In steel vessels, direct current is made available for power lines on Power Line Communication.

5 Proposed date of entry into force

December, 2020
