

Draft Amendment of Part B of the “Quarantine Requirements for the Importation of Plants or Plant Products”

Quarantine requirements for host plants or plant products of *Tomato brown rugose fruit virus* (Tobamovirus) from infected areas are added to Part B, which require a statement of pre-export laboratory testing to assure the disease-free status of this virus on the phytosanitary certificate. Consignments fail to meet the abovementioned condition shall be reshipped or destroyed.

Proposed Quarantine Requirements for Host Plants or Plant Products of *Tomato brown rugose fruit virus (Tobamovirus)*

Plants or Plant Products	Countries or Districts of Origin	Diseases or Pests	Quarantine Requirements
<p>The seeds of the following plants (except used as foods and feeds):</p> <p>(1) <i>Capsicum</i> spp. (2) <i>Solanum lycopersicum</i> = <i>Lycopersicon esculentum</i></p>	<p>Asia and Pacific Region</p> <p>(1) China (2) Israel (3) Jordan (4) Palestine (5) Turkey</p> <p>Europe</p> <p>(6) Cyprus (7) Czech Republic (8) France (9) Germany (10) Greece (11) Italy (12) Netherlands (13) Spain (14) United Kingdom</p> <p>North America</p> <p>(15) Mexico</p>	<p><i>Tomato brown rugose fruit virus (Tobamovirus)</i></p>	<p>The importing of the plants and plant parts shall be accompanied by the phytosanitary certificate issued by the plant quarantine authority of the exporting country, stating that the plants or plant parts have been thoroughly inspected during laboratory tested before export and found free from Tomato brown rugose fruit virus, otherwise, the plants or plant parts will be destroyed or reshipped.</p>
