

Partial amendment to the Minimum Requirements for Radiopharmaceuticals

The Minimum Requirements for Radiopharmaceuticals will be amended as follows:

The following article will be revised under The Minimum Requirements for Radiopharmaceuticals.

3-Iodobenzylguanidine (^{131}I) injection

Krypton ($^{81\text{m}}\text{Kr}$) Generator

Indium (^{111}In) chloride injection

The following 2 reagents, test solutions etc. under the section of GENERAL TESTS will be newly established.

Octylsilyl silica gel for thin-layer chromatography

Octylsilyl silica gel with fluorescent agent for thin-layer chromatography

The test method of following reagent under the section of GENERAL TESTS will be added.

3-Iodobenzylguanidium sulfate
