

Outline of Proposed Amendment to Ministerial Ordinance

1 Item

Partial amendment of Ordinance Regulating Radio Equipment

2 Amendment to ministerial ordinance

Ordinance Regulating Radio Equipment

3 Reasons for amendment

It is required that efficient use and sharing use of frequencies to deal with increasing mobile communication's traffic. Based on such situations, Information and Communications Council of Japan studied to introduce Cellular system in 2.3GHz band by using dynamic frequency sharing with the existing wireless systems, to consider the operation time and place of these systems on a case-by-case basis.

The amendment is a revision of the technical standards to introduce Cellular system in 2.3GHz band, in order to improve mobile communication's traffic.

4 Outline of the amendment

Technical requirements of Cellular system in 2.3GHz band (to be added)

Item	
Name	Cellular system in 2.3GHz band
Frequency Allocation	2330-2370MHz
Duplex	TDD
Other main items	Compliant with 3GPP.
Operational conditions	Cellular operators have to take dynamic frequency sharing method with the existing wireless systems.

5 Proposed date of entry into force

October, 2021
