COMMISSION REGULATION (EU) .../...

of **XXX**

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for isoxaben, novaluron and tetraconazole in or on certain products

(Text with EEA relevance)

COMMISSION REGULATION (EU) .../...

of **XXX**

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for isoxaben, novaluron and tetraconazole in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC¹, and in particular Article 14(1), point (a), Article 18(1), point (b), and Article 49(2) thereof,

Whereas:

- (1) For isoxaben, novaluron and tetraconazole maximum residue levels ('MRLs') were set in Part A of Annex III to Regulation (EC) No 396/2005.
- (2) For isoxaben, the European Food Safety Authority ('the Authority') submitted a reasoned opinion on the review of the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005². The Authority recommended lowering the existing MRLs for fruits and tree nuts, root and tuber vegetables, bulb vegetables, melons, pumpkins, witloof, chives, celery leaves, stem vegetables, oilseeds and oil fruits, cereals, and chicory roots, in line with the principle of setting MRLs at levels as low as reasonably achievable and based on sufficient supporting data for the current good agricultural practices ('GAPs'). It recommended keeping the existing MRLs for courgettes and beans (fresh, without pods) based on sufficient supporting data for the current GAPs. As there is no risk for consumers with any of those MRLs, it is appropriate to set the MRLs for those products in Annex II to Regulation (EC) No 396/2005 at the level identified by the Authority.
- (3) For isoxaben, the Authority further concluded that the MRLs for sage, rosemary, thyme, basil, cotton seed, herbal infusions (dried, flowers), herbal infusions (dried, roots), and hops should be set at the current limits of determination ('LOD') specific to each product, in line with the principle of setting MRLs at levels as low as reasonably achievable and based on the current GAPs. However, as some information was not available, further consideration by risk managers was required. While these MRLs are considered safe, they will therefore be reviewed. The review will take into account the information available within two years from the publication of this Regulation. As there is no risk for consumers, it is appropriate to set the MRLs for

those products at the LODs specific to each product in Annex II to Regulation (EC) No 396/2005.

- (4) For novaluron, the Authority submitted a reasoned opinion on the review of the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005³. In view of various data gaps on toxicologically relevant issues, including uncertainties regarding possible endocrine disruptor properties of that active substance, the Authority could not rule out harmful effects on human health with the MRLs for novaluron in all products. It is therefore appropriate to set the MRLs for all products at the LODs specific to each product in Annex II to Regulation (EC) No 396/2005.
- (5) For tetraconazole, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005⁴. It recommended keeping the existing MRL for kaki/Japanese persimmons based on sufficient supporting data for the current GAPs. As there is no risk for consumers, it is appropriate to set the MRL for kaki/Japanese persimmons in Annex II to Regulation (EC) No 396/2005 at the level identified by the Authority.
- (6) For tetraconazole, the Authority further concluded that the MRLs for loquats, apricots, peaches, table grapes, wine grapes, strawberries, cucumbers, gherkins, courgettes, rye, wheat, sugar beet root, products of animal origin except bovine liver and horse liver, and milks should be lowered in line with the principle of setting MRLs at levels as low as reasonably achievable and based on the current GAPs. It concluded that the MRLs for apples, pears, quinces, medlars, peppers, witloofs, globe artichokes, linseeds, rapeseeds, barley, buckwheat, maize, millet, oat, rice, sorghum, and birds' eggs should be maintained based on the current GAPs. It further concluded that the MRLs for tomatoes, aubergines, melons, pumpkins, watermelons, chicory roots, bovine liver and horse liver should be raised based on the current GAPs. However, as some information was not available, further consideration by risk managers was required. While these MRLs are considered safe, they will therefore be reviewed. The review will take into account the information available within two years from the publication of this Regulation. As there is no risk for consumers, it is appropriate to set the MRLs for those products in Annex II to Regulation (EC) No 396/2005 at the levels identified by the Authority.
- (7) The Authority assessed the existing Codex maximum residue levels ('CXLs') in its reasoned opinions. For setting the MRLs, the Commission has taken into account those CXLs that are considered safe for consumers in the Union.
- (8) As regards products on which the use of plant protection products containing the active substances isoxaben, novaluron or tetraconazole is not authorised, and for which no import tolerances or CXLs exist, it is appropriate to set the MRLs at the specific LODs, or the default MRL should apply as provided for in Article 18(1), point (b), of Regulation (EC) No 396/2005.

³ European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for novaluron according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2022;20(1):7041.

⁴ European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for isoxaben according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2022;20(1):7111.

- (9) The Commission consulted the European Union reference laboratories for residues of pesticides on the need to adapt certain LODs. For all the active substances covered by this Regulation, those laboratories proposed product specific LODs.
- (10) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (11) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (12) For isoxaben and tetraconazole, to allow for the normal marketing, processing and consumption of products, this Regulation should not apply to products, which have been produced in the Union or imported into the Union before the new MRLs become applicable and for which a high level of consumer protection is maintained.
- (13) A reasonable period should be allowed to elapse before the new MRLs become applicable, in order to permit Member States, third countries and food business operators to adapt themselves to the requirements which result from the modification of the MRLs.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes II and III to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

Article 2

As regards the active substances isoxaben and tetraconazole in and on all products, Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced in the Union or imported into the Union before ... [*Office of Publications: please insert date 6 months after entry into force of this Regulation*].

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from ... [*Office of Publication: please insert date 6 months after entry into force*].

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission
The President
Ursula VON DER LEYEN
