National foreword

Uganda National Bureau of Standards (UNBS) is a parastatal under the Ministry of Trade, Industry and Cooperatives established under Cap 327, of the Laws of Uganda, as amended. UNBS is mandated to coordinate the elaboration of standards and is

- (a) a member of International Organisation for Standardisation (ISO),
- (b) a contact point for the WHO/FAO Codex Alimentarius Commission on Food Standards, and
- (c) the National Enquiry Point on TBT Agreement of the World Trade Organisation (WTO).

The work of preparing Uganda Standards is carried out through Technical Committees. A Technical Committee is established to deliberate on standards in a given field or area and consists of representatives of consumers, traders, academicians, manufacturers, government and other stakeholders.

Draft Uganda Standards adopted by the Technical Committee are widely circulated to stakeholders and the general public for comments. The committee reviews the comments before recommending the draft standards for approval and declaration as Uganda Standards by the National Standards Council.

This Draft Uganda Standard, DUS DARS 466: 2022, *Milled maize (corn) products — Specification*, is identical with and has been reproduced from an African Standard, DARS 466: 2022, *Milled maize (corn) products — Specification*, and adopted as a Uganda Standard.

The committee responsible for this document is Technical Committee UNBS/TC 203, *Cereals, pulses and related products and processes*.

Wherever the words, "African Standard" appear, they should be replaced by "Uganda Standard".

Foreword

The African Organization for Standardization (ARSO) is an African intergovernmental organization made up of the United Nations Economic Commission for Africa (UNECA) and the Organization of African Unity (AU). One of the fundamental mandates of ARSO is to develop and harmonize African Standards (ARS) for the purpose of enhancing Africa's internal trading capacity, increase Africa's product and service competitiveness globally and uplift the welfare of African communities. The work of preparing African Standards is normally carried out through ARSO technical committees. Each Member State interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, Regional Economic Communities (RECs), governmental and non-governmental organizations, in liaison with ARSO, also take part in the work.

ARSO Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare ARSO Standards. Draft ARSO Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an ARSO Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ARSO shall not be held responsible for identifying any or all such patent rights.

This African Standard was prepared by the ARSO Technical Committee on Cereals, pulses and derived products (ARSO/TC 12).

Introduction

Maize products are processed from maize grain which is produced in larger quantities in Africa. Maize is a major food security crop in Sub-Saharan Africa, being the staple food for an estimated 50 percent of the population.

This standard has been revised to take into account:

- a) the needs of the market for the product;
- b) the need to facilitate fair domestic, regional and international trade and prevent technical barriers to trade by establishing a common trading language for buyers and sellers;
- c) the structure of the CODEX, UNECE, USA, ISO and other internationally significant standards;
- d) the needs of the producers in gaining knowledge of market standards, conformity assessment, commercial cultivars and crop production process;
- e) the need to transport the product in a manner that ensures keeping of quality until it reaches the consumer;
- f) the need for the plant protection authority to certify, through a simplified form, that the product is fit for cross-border and international trade without carrying plant disease vectors;
- g) the need to promote good agricultural practices that will enhance wider market access, involvement of small-scale traders and hence making farming a viable means of wealth creation; and
- h) the need to ensure a reliable production base of consistent and safe crops that meet customer requirements.

The scope of this African Standard has also been expanded to cover sifted maize meal, granulated maize meal, maize flour and whole maize meal as opposed to covering only whole maize meal which was the case in the previous edition.

This African Standard is a technical revision of the earlier ARS 466:2013 (E), *Whole maize meal — Specification* which is hereby superseded and cancelled.

Milled maize (corn) products — Specification

1 Scope

This African Standard specifies requirements, sampling and test methods for whole maize meal, granulated maize meal, sifted maize meal, maize grits and maize flour from the grains of common maize (*Zea mays* L.) intended for human consumption.

This standard does not apply to fortified milled maize (corn) products and maize grits intended for brewing, manufacturing of starch and any other industrial use.

3 Terms and definitions

For the purpose of this standard the following terms and definitions apply.

3.1

milled maize (corn) products

products obtained from maize grains (*Zea mays* L.) through milling process

3.2

whole maize meal

food prepared from fully mature, sound, un-germinated, whole kernels of maize, (*Zea mays* L.), by a grinding process in which the entire grain is comminuted to a suitable degree of fineness

3.3

granulated maize meal

coarse product obtained from the milling and sifting of clean shelled maize

3.4

sifted maize meal

form of granulated maize meal that has been reduced to a certain degree of fineness

3.5

sifting

particle size separation by sieving and aspiration of roll-milled products

3.6

cleaned maize

shelled maize that shall have been subjected to a cleaning process for the removal of foreign and objectionable matter originally present

3.7

maize flour

product obtained by removing the germ and bran followed by grinding, clean maize kernels using roller mills or other methods and sifting the resulting product to suitable degree of fineness.

3.8

foreign matter and extraneous matter

all organic and inorganic material other than maize

3.8.1

organic foreign matter

any animal or plant matter other than milled maize products

3.8.2

inorganic foreign matter

components, such as stone, sand and dust

DARS 466:2022 (E)

4 Requirements

4.1 Raw materials

Milled maize (corn) products shall be made from shelled maize kernels conforming to the requirements given in ARS 461.

4.2 General requirements

4.2.1 Milled maize (corn) products shall:

- a) be of natural colour conforming to the colour of maize from which it was prepared.
- b) not contain any foreign matter such as insects, fungi, dirt or other contaminants
- c) be free from fermented musty or other objectionable colours.
- d) be free from rancidity and foreign odours.
- e) be wholesome and fit for human consumption in all aspects.

4.3 Specific requirements

Milled maize products shall conform to the requirements given in Table 1.

Table 1 — Specific requirements

S/No.	Characteristic	Type				Test method
		Sifted maize meal	Granulated maize meal	Whole maize meal	Maize flour	
(1)	Fibre content, % by m/m, max.	0.8	1.8	3.0	0.7	ISO 5498
(2)	Crude fat on a moisture free basis, % by m/m, max.	2.5	2.25	3.1*	2.2	ISO 11085
(3)	Moisture content, % by m/m, max.	13	13	13	13	ISO 711/ ISO 712
(4)	Total ash, % by m/m, max.	1.2	1.7	3.0	1.0	ISO 2171
(5)	Acid insoluble ash, % by m/m, max.	0.15	0.15	0.30	0.1	ISO 5985
(6)	Fat acidity, mg KOH per 100g of product, on dry mass basis max	45	40	50	50	ISO 660
(7)	Total Aflatoxin (AFB1+AFB2+AFG1+AFG2), ppb max	10				ISO 16050
(8)	Aflatoxin B1 only, ppb max	5				
(9)	Fumonisin ppm max	2				AOAC Official Method 2001.04
NOTE	Milled maize products destined for processing baby foods shall have total aflatoxin level of not more than 4 ppb. * Minimum crude fat on moisture free basis for whole maize meal					

5 Food additives

The product shall contain only permitted additives complying with CODEX STAN 192.

6 Hygiene

Milled maize products shall be produced and handled under hygienic conditions in accordance with ARS 53 and shall comply with the microbial limits given in Table 2 when tested in accordance with the test methods prescribed therein.

Table 2 — Microbiological limits

S/N	Micro-organism(s)	Requirements	Method of test
(1)	Total plate count, cfu/g max	10 ⁵	ISO 4833
(2)	<i>Staphylococcus aureus</i> cfu/g max	< 10	ISO 6888
(3)	<i>Escherichia coli</i> , cfu/g	Absent	ISO 7251
(4)	<i>Salmonella</i> , per 25g	Absent	ISO 6579
(6)	Yeasts and moulds, cfu/g, max.	10 ⁴	ISO 21527-2
(7)	<i>Vibrio cholerae</i>	absent	ISO/TS 21872

7 Contaminants

7.1 Heavy metals

Milled maize products shall comply with those maximum limits for metal contaminants specified in CODEX STAN 193

7.2 Pesticide residues

Milled maize products shall comply with those maximum residue limits established by the Codex Alimentarius Commission for this commodity.

8 Packaging

Milled maize shall be packed in food grade packaging material, which will safeguard the hygienic, nutritional and organoleptic qualities of the products.

DARS 466:2022 (E)

9 Labelling

The following specific labelling requirements shall apply and shall be legibly and indelibly marked in accordance with the requirements of ARS 56:

- i) name of product as "Whole Maize Meal, Sifted Maize Meal, Maize Flour or Granulated Maize Meal";
- ii) name and address of the manufacturer/packer/importer;
- iii) brand name/registered trade mark;
- iv) batch or code number;
- v) net weight in metric units;
- vi) the statement "Store in a Cool and Dry Place";
- vii) the statement "Human Food";
- viii) country of origin;
- ix) date of manufacture;
- x) best before date;
- xi) instructions for disposal of used package.

10 Sampling

Sampling shall be done in accordance with the ISO 24333.
