- Import will be permitted on condition of either (1) or (2):
 - (1) By certifying that the exported seeds are produced in areas, places or production sites free from *Potato spindle tuber viroid*. Each consignment must be accompanied by the Phytosanitary Certificate endorsed with the following additional declaration:

“The seeds are produced from pest free area, places or production site for Potato spindle tuber viroid by establishing and maintaining the pest free status in accordance with ISPM No. 4 or No. 10.”
 - (2) By certifying that the export seeds are free from *Potato spindle tuber viroid* through PCR test before export. Each consignment must be accompanied by Phytosanitary Certificate endorsed with the following additional declaration.

“The seeds were tested by PCR before export and found free from Potato spindle tuber viroid.”

Or each consignment should be accompanied by the Phytosanitary Certificate and a separate “PCR Inspection Certificate (see attachment 2)”

PCR test results from public testing agencies and labs authorized by the NPPO (educational organizations, commercial testing labs or seed industry labs etc.) will be accepted.

- If the PCR test certificate is accompanied, the copy of authorization of the testing agencies or labs issued by the NPPO of an export country and the electrophoresis report of PCR test would be required.

3. The date of application
