

Expanding target livestock of feed with 25-Hydroxycholecalciferol

Ministry of Agriculture, Forestry and Fisheries (MAFF) will amend standards and specifications of 25-Hydroxycholecalciferol in the ministerial ordinance.

Outline of standards and specifications is as follows.

25-Hydroxycholecalciferol

Compositional specifications in general

The content of 25-hydroxycholecalciferol in feeds must be no more than 100 mg per ton of feed for cows, 50 mg per ton of feed for pigs and/or 80 mg per ton of feed for chickens.

Specifications for method of manufacture of feed in general

25-hydroxycholecalciferol is allowed to be used as a feed additive for cows, pigs and chickens only.
