## National foreword

Uganda National Bureau of Standards (UNBS) is a parastatal under the Ministry of Trade, Industry and Cooperatives established under Cap 327, of the Laws of Uganda, as amended. UNBS is mandated to coordinate the elaboration of standards and is

- (a) a member of International Organisation for Standardisation (ISO),
- (b) a contact point for the WHO/FAO Codex Alimentarius Commission on Food Standards, and
- (c) the National Enquiry Point on TBT Agreement of the World Trade Organisation (WTO).

The work of preparing Uganda Standards is carried out through Technical Committees. A Technical Committee is established to deliberate on standards in a given field or area and consists of representatives of consumers, traders, academicians, manufacturers, government and other stakeholders.

Draft Uganda Standards adopted by the Technical Committee are widely circulated to stakeholders and the general public for comments. The committee reviews the comments before recommending the draft standards for approval and declaration as Uganda Standards by the National Standards Council.

This Draft Uganda Standard, DUS DARS 1838: 2023, *Fish meal as animal feed — Specification*, is identical with and has been reproduced from an African Standard, DARS 1838: 2023, *Fish meal as animal feed — Specification*, and adopted as a Uganda Standard.

The committee responsible for this document is Technical Committee UNBS/TC 210, *Animal feeds and feeding stuffs*.

Wherever the words, "African Standard" appear, they should be replaced by "Uganda Standard".

## Foreword

The African Organization for Standardization (ARSO) is an African intergovernmental organization established by the United Nations Economic Commission for Africa (UNECA) and the Organization of African Unity (AU) in 1977. One of the fundamental mandates of ARSO is to develop and harmonize African Standards (ARS) for the purpose of enhancing Africa's internal trading capacity, increase Africa's product and service competitiveness globally and uplift the welfare of African communities. The work of preparing African Standards is normally carried out through ARSO technical committees. Each Member State interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, Regional Economic Communities (RECs), governmental and non-governmental organizations, in liaison with ARSO, also take part in the work.

ARSO Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare ARSO Standards. Draft ARSO Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an ARSO Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ARSO shall not be held responsible for identifying any or all such patent rights.

This African Standard was prepared by ARSO/TC 17, *Animal feeding, feeds and feeding stuffs*.

## **Introduction**

Fish meal is a rich source of high-quality protein and contains besides calcium and phosphorus, unidentified growth factors which are necessary for maximum growth rate and reproduction in livestock. The incorporation of fish meal in animal feeds, especially poultry feeds and pig feeds has become a regular practice in the animal feed industry.

The development of this standard will not only serve as an important and useful reference document for any envisaged large scale fish meal production but will go a long way to assist present manufacturers produce quality fish meal.

## Fish meal as animal feed — Specification

### 1 Scope

This African Standard specifies requirements, sampling and test methods for fish meal used in compounding animal feeds.

### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

AOAC 952.13, *Arsenic in food — Silver diethyldithiocarbamate*

CAC/RCP 54, *Code of practice on good animal feeding*

ARS 56, *Pre-packaged foods - Labelling*

ISO 5983-1, *Animal feeding stuffs — Determination of nitrogen content and calculation of crude protein content — Part 1: Kjeldahl method*

ISO 5984, *Animal feeding stuffs — Determination of crude ash*

ISO 5985, *Animal feeding stuffs — Determination of ash insoluble in hydrochloric acid*

ISO 6490-1, *Animal feeding stuffs — Determination of calcium content — Part 1: Titrimetric method*

ISO 6491, *Animal feeding stuffs — Determination of phosphorus content — Spectrometric method*

ISO 6492, *Animal feeding stuffs — Determination of fat content*

ISO 6495, *Animal feeding stuffs — Determination of water-soluble chlorides content*

ISO 6496, *Animal feeding stuffs — Determination of moisture and other volatile matter content*

ISO 6497, *Animal feeding stuffs — Sampling*

ISO 6561-1, *Fruits, vegetables and derived products — Determination of cadmium content — Part 1: Method using granite furnace atomic absorption spectrometry*

ISO 6561-2, *Fruits, vegetables and derived products — Determination of cadmium content — Part 2: Method using flame atomic absorption spectrometry*

ISO 6579-1, *Microbiology of the food chain — Horizontal method for the detection, enumeration and serotyping of Salmonella — Part 1: Detection of Salmonella spp*

ISO 6633, *Fruits, vegetables and derived products — Determination of lead content — Flameless Atomic Absorption Spectrometric Method*

ISO 13720, *Meat and meat products — Enumeration of presumptive Pseudomonas species*

ISO 16050, *Foodstuffs — Determination of aflatoxin B1, and the total content of aflatoxins B1, B2, G1 and G2 in cereals, nuts and derived products — High-performance liquid chromatographic method*

ISO 16654, *Microbiology of food and animal feeding stuffs — Horizontal method for the detection of Escherichia coli O157*

ISO 17375, *Animal feeding stuffs — Determination of aflatoxin B1*

# DARS 1838:2023

*BS EN 15763 Foodstuffs. Determination of trace elements. Determination of arsenic, cadmium, mercury and lead in foodstuffs by inductively coupled plasma mass spectrometry (ICPMS) after pressure digestion*

*BS EN 14084:2003 Foodstuffs. Determination of trace elements. Determination of lead, cadmium, zinc, copper and iron by atomic absorption spectrometry (AAS) after microwave digestion*

*AOAC Official Method 941.04 Urea and Ammoniacal Nitrogen in Animal Feed*

## 3 Terms and definitions

For the purpose of this document the following terms and definitions apply.

### 3.1

#### **fish meal**

product obtained by drying (removing fat where necessary) and grinding whole fish, or parts thereof, of various species.

### 3.2

#### **extraneous matter**

organic or inorganic materials other than fish meal such as metallic objects, sand, stones, chaff, insects and others

## 4 Requirements

### 4.1 General requirements

Fish meal shall be free from:

- i. extraneous matter;
- ii. adulterants
- iii. harmful constituents
- iv. insect infestation
- v. visible fungal growth
- vi. off odour

### 4.2 Specific requirements

Fish meal shall comply with the requirements specified in Table 1 when tested in accordance with the test methods specified therein.

Table 1 — Specific requirements for fish meal

Characteristic		Requirements	Test methods
i	Moisture, % m/m, max.	10	ISO 6496
ii	Crude protein, % m/m, min.	55	ISO 5983-1
iii	Crude fat, % m/m, max.	12	ISO 6492
iv	Acid insoluble ash, % m/m, max.	3	ISO 5985
v	Total ash, % m/m, max.	20	ISO 5984
vi	Calcium, % m/m, min.	3	ISO 6490-1
vii	Phosphorous, % m/m, min.	1.5	ISO 6491
viii	Ammoniacal nitrogen, % m/m, max	0,5	AOAC 941.04.06
ix	Sodium chloride, % m/m, max.	2	ISO 6495

## 5. Food additives

Fish meal shall comply with the maximum additives' limits established by the Codex Alimentarius Commission (CODEX STAN 192).

## 6. Contaminants

### 6.1 Aflatoxin

Fish meal shall comply with the limits for aflatoxin specified in Table 3 when tested in accordance with the test methods specified therein.

Table 2 — Aflatoxin limits for fish meal

S/No	Aflatoxin	Maximum limits ( $\mu\text{g}/\text{kg}$ )	Test methods
i.	Total aflatoxin	10.0	ISO 16050
ii.	Aflatoxin B <sub>1</sub>	5.0	ISO 17375

# DARS 1838:2023

## 6.2 Pesticide residues

Fish meal shall comply with the maximum pesticide residue limits established by the Codex Alimentarius Commission.

## 6.3 Heavy metals

Fish meal shall comply with the maximum limits for heavy metals specified in Table 3 when tested in accordance with the test methods specified therein.

**Table 3 — Limits for heavy metals in fish meal**

S/No	Heavy metal	Maximum limit mg/kg	Test methods
i.	Arsenic, (As)	2,0	AOAC 952.13
ii.	Lead (Pb)	5,0	ISO 6633
iii.	Cadmium (Cd)	1,0	ISO 6561-1 ISO 6561- 2
iv.	Mercury (Hg)	0,1	BS EN 14084, BS EN 15763

## 7. Hygiene

7.1 Fish meal shall be prepared and handled in accordance with CAC/RCP 54.

7.2 Fish meal shall comply with the microbiological limits specified in Table 4 when tested in accordance with the test methods specified therein.

**Table 4 — Microbiological requirements in fish meal**

S/No	Microorganism	Requirement	Test methods
I.	<i>Escherichia coli</i> ( <i>E - coli</i> )	Absent	ISO 16654
II.	<i>Salmonella spp</i>	Absent	ISO 6579-1
III.	<i>Pseudomonas aeruginosa</i>	Absent	ISO 13720

## **8. Packaging**

Fish meal shall be packaged in suitable containers that are of sufficient strength, and sufficiently sealed to withstand reasonable handling without tearing, bursting or falling open. The containers shall be clean and not previously used.

## **9. Labelling**

In addition to the requirements in ARS 56, each package shall be legibly and indelibly marked with the following:

- a) name of the product as "Fish meal"
- b) name and physical address of the manufacturer/exporter/packer
- c) country of origin
- d) additives, if included
- e) net weight in metric units
- f) directions and precautions for use
- g) batch number/lot identification
- h) manufacturing date
- i) expiry date / used before date
- j) storage instructions
- k) nutrients composition

## **10. Sampling**

Sampling shall be done in accordance with ISO 6497
